

WARNING

These slides are **not optimized for printing** or exam preparation. These are for lecture delivery only.

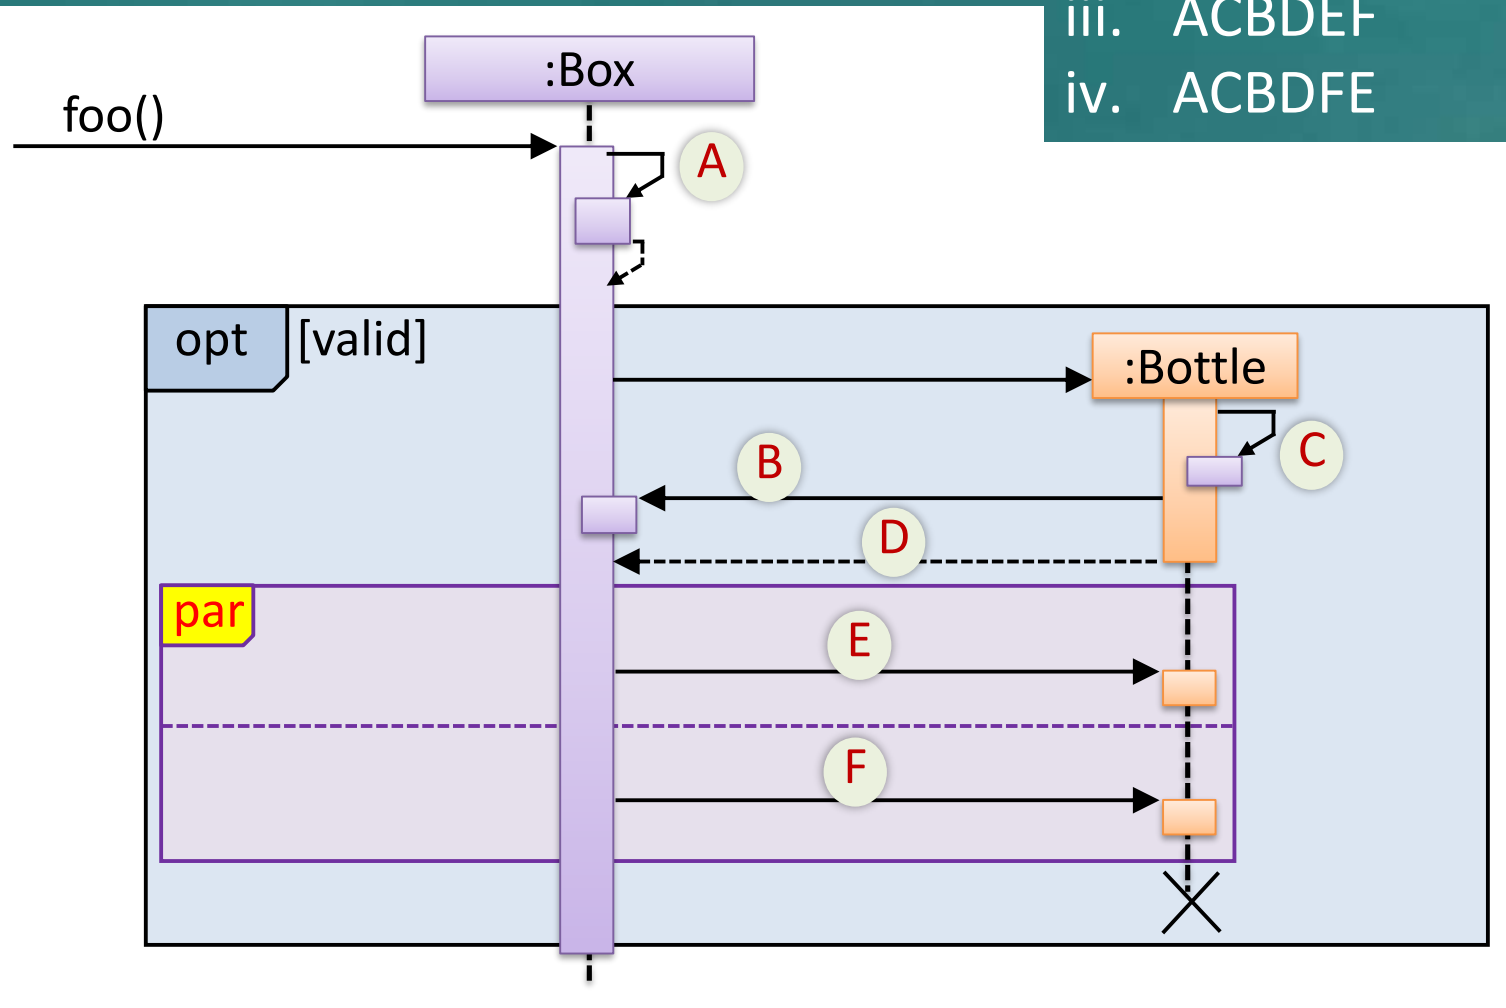

These slides contain a lot of animations. For optimal results, **watch in slideshow mode**.

Which of these sequences of interactions are possible?

- i. A
- ii. ABCD
- iii. ACBDEF
- iv. ACBDFE

Shorter due to the
tP briefing

Similar to an
exam question

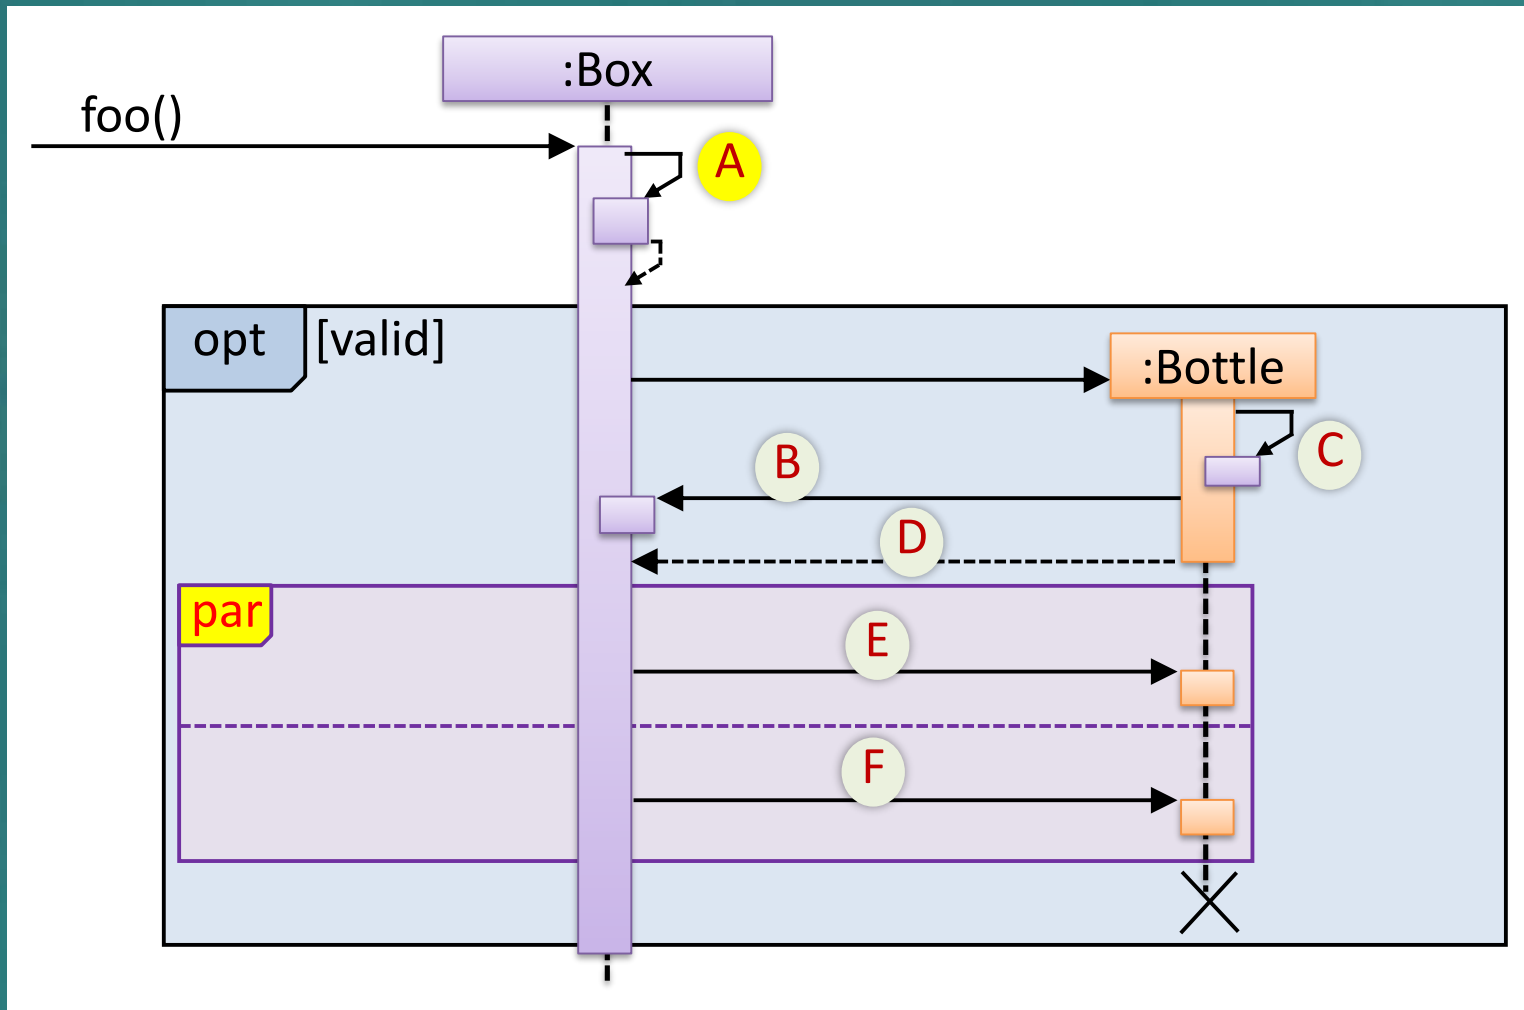

Answer this in the Canvas quiz

Q₁

Is this sequence possible? A

☐ Yes

☐ No

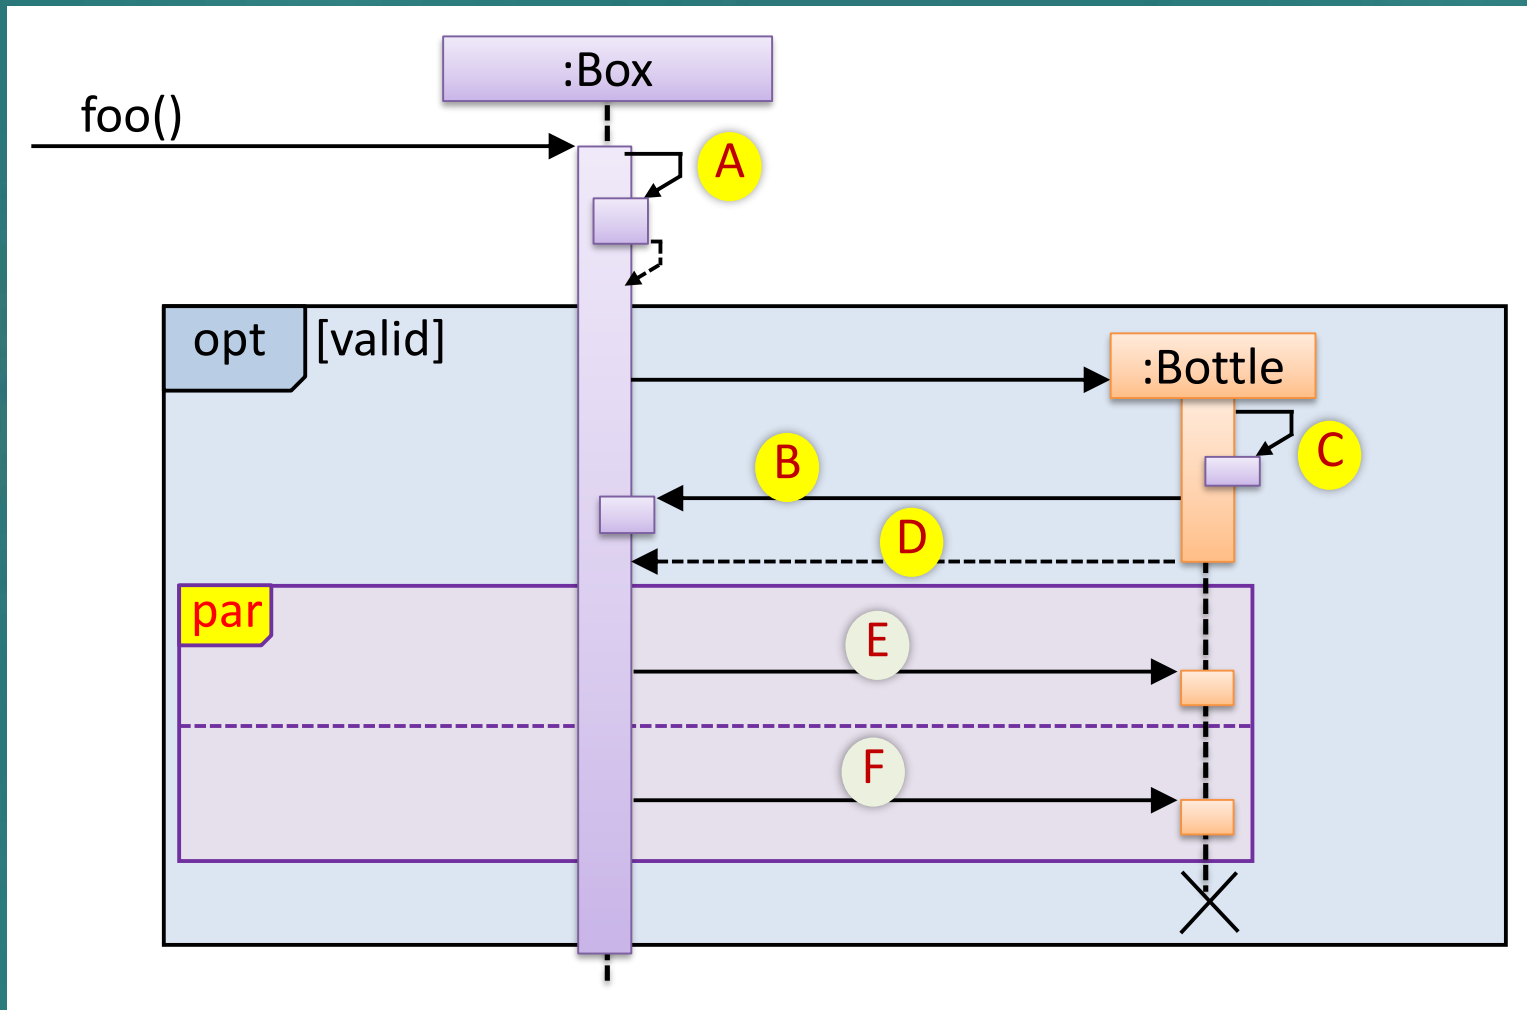

Q₂

Is this sequence possible? **ABCD**

☐ Yes

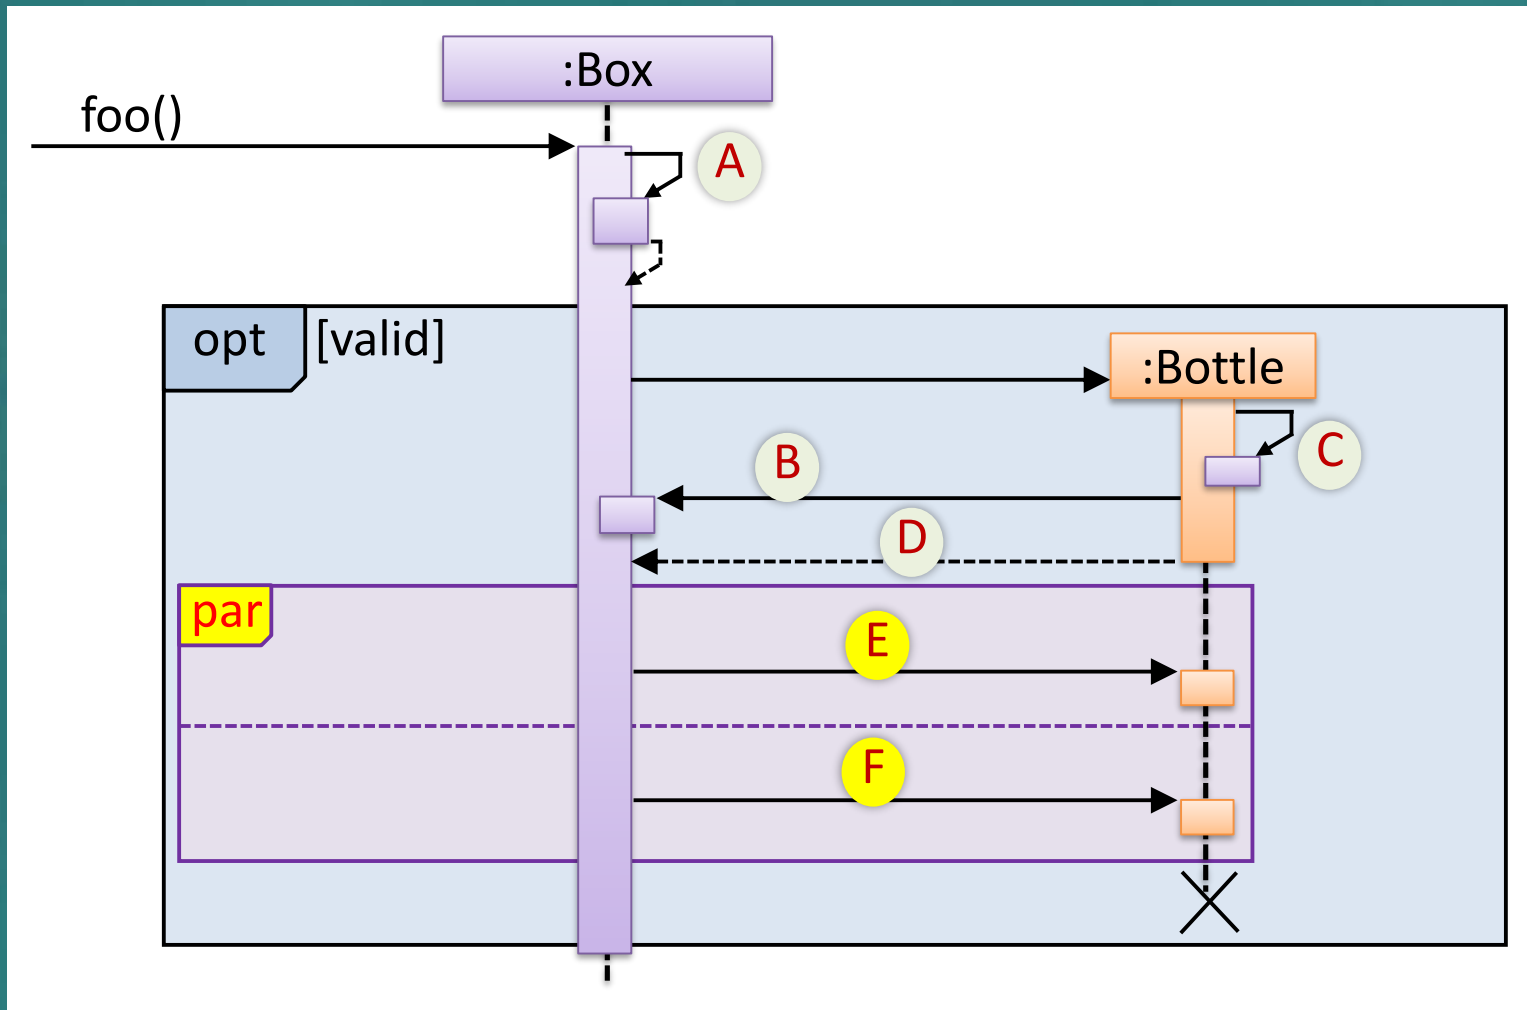

☐ No

Q₃

Is this sequence possible? ACBDEF

- ☐ Yes
- ☐ No

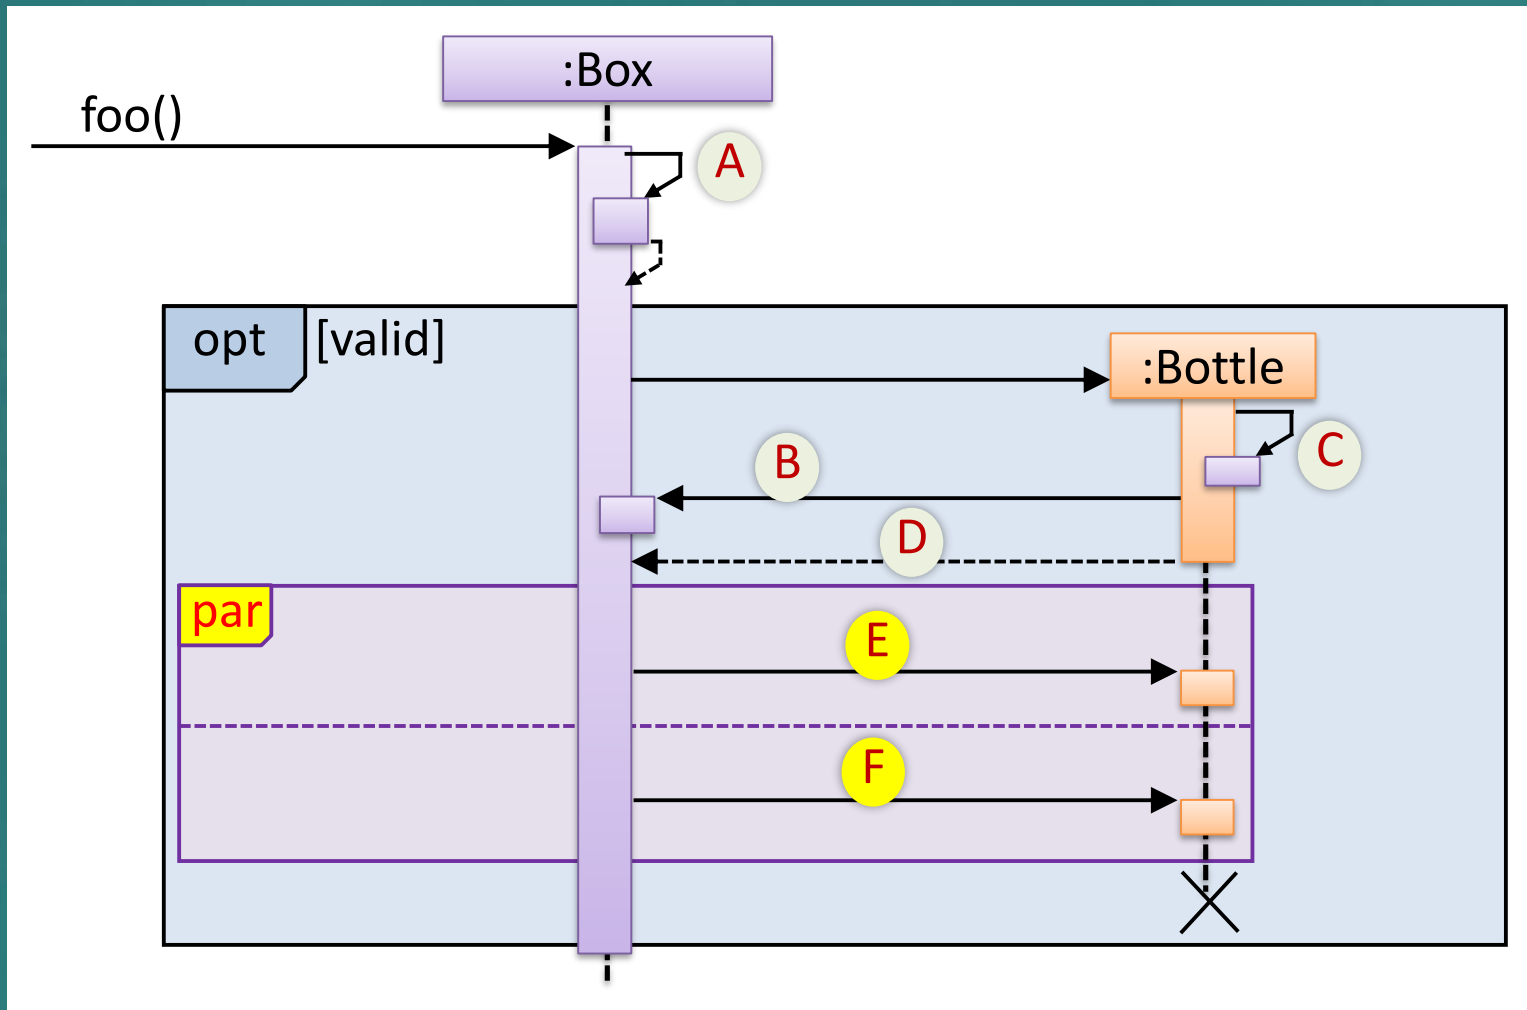

Q₄

Is this sequence possible? ACBDFE

☐ Yes

☐ No

How to show exceptions, try blocks, lambdas, recursion in a sequence diagrams?

- [] Don't bother.
- [] Not the purpose of SDs.
- [] Not in the scope of this course.
- [] It's impossible.

Use a UML Note when other notations are not enough

Or use code/pseudo-code

In our context, UML models are not meant to be 'code as diagrams'. They usually,

- capture only one aspect,
- capture only things relevant to the purpose
- should not result in very complicated diagrams

Which are true?

- ☐ *logging* is like a CCTV camera system
- ☐ *logging* is like a black-box of an air plane
- ☐ *assertions* are like smoke alarms
- ☐ *exceptions* are like safety nets for acrobats

Week 7

Topics:

- [W7.1] Requirements: Use Cases ⚡

- [W7.2] Design: High-Level View ⚡⚡⚡

- [W7.3] Design: Front-End

- [W7.4] Design: Back-End

- [W7.5] Design: Database

- [W7.6] Design: Integration

- [W7.7] Design: Security

- [W7.8] Design: Performance

- [W7.9] Design: Usability

➤ [W7.1] Requirements: Use Cases

🔗 Follow up notes for the item(s) above:

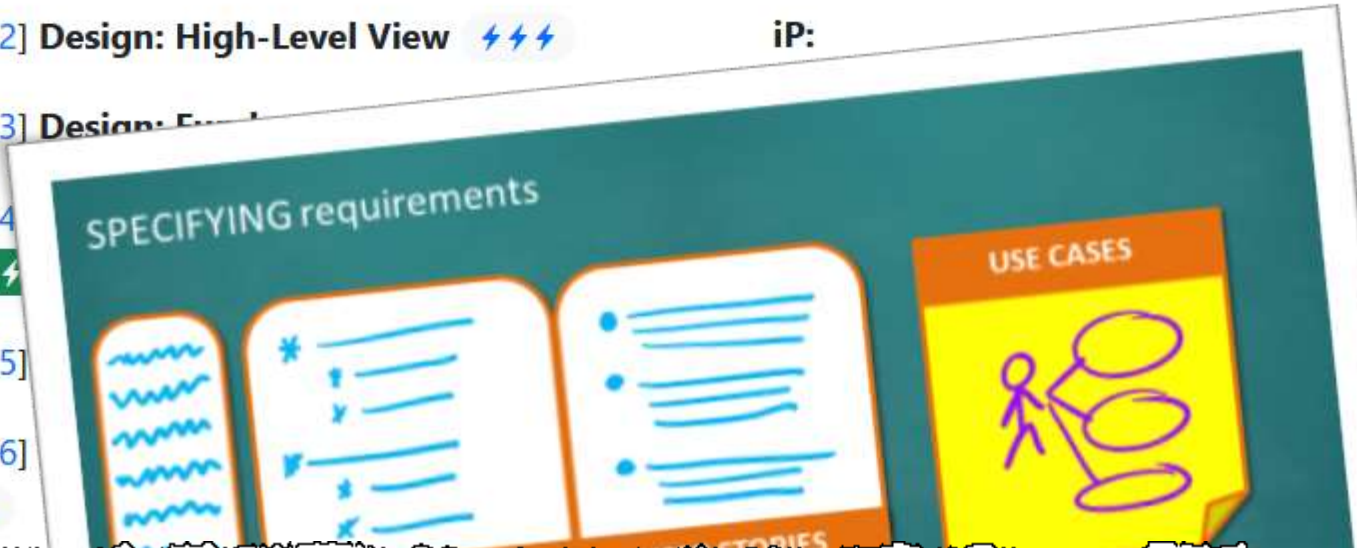

Now that you know all the different ways of specifying requirements, **here is an example that shows how all techniques of specifying requirements can work together:**

➤ **Video** Example: TeamFormer

4.  Start the next iteration

A photograph of a person, likely a patient, lying down in a medical or clinical setting. The person's head is at the top of the frame, and their torso is visible. They are wearing a dark-colored garment. A large black rectangular box is superimposed over the center of the image, containing yellow text. In the background, on the right side, there are signs on a wall, including one that says "EMERGENCY" and another that says "NO AD".

If you eat fruits only, there is no
need to clean your body.
The body cleans itself.

Young Steve Jobs thought that by eating only fruits the need to shower was eliminated, so he stopped showering. When he worked for Atari (a game dev company), his co-workers complained about his body odor, and his boss had to let him to come do the work at night so that he wouldn't need to interact with other people.

A project cannot fail because of one person.

Its **better** to do **less work** but of **better quality**
than to do **more work** but of **poor quality**

Never is better than late (?)

Most of all, be sincere.
