- Discussion

SINGAPORE'S ECONOMIC DEVELOPMENT

“In short, industry would modernise and enrich... [and it] would not only generate economic growth but also help to bring about a rapid transformation of social attitudes to those more consistent with needs of modernising societies”

-- Dr Goh Keng Swee, Singapore's first Finance Minister

SINGAPORE'S PAST

Pollution | Slums | Unemployment

1959 - Self governance
1965 - Independence

GDP : USD 974 M
Per Capita: USD 516
Unemployment: 9%
Economy: Labour-intensive

INDUSTRIALISATION: A WAY TO SURVIVE

Early years, industrialisation was necessary for Singapore to survive in order to:

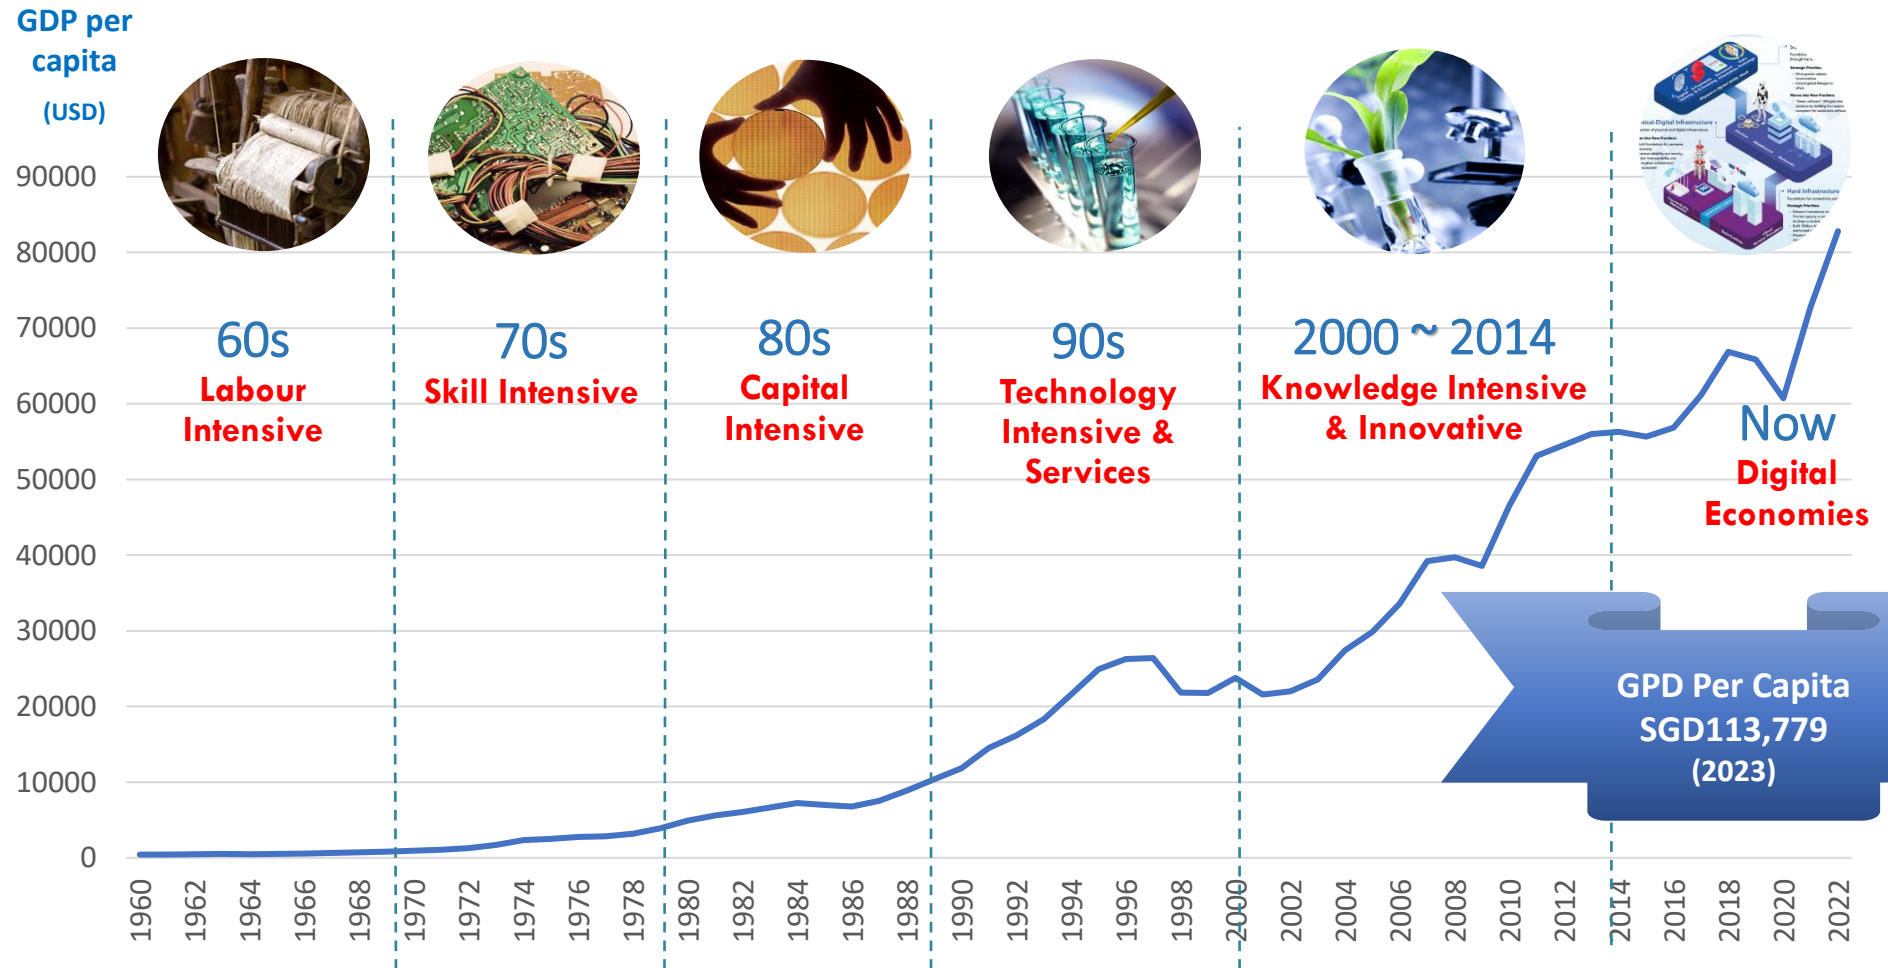

- reduce economic dependence on entrepot trade
- create jobs for its rapidly growing population

Singapore's economic survival depended on its ability to:

- provide necessary **industrial infrastructure**
- attract investors to set up manufacturing plants
- satisfy investor needs quickly and well

SINGAPORE INDUSTRIAL DEVELOPMENT

SINGAPORE'S PRESENT

Knowledge-based & Digital Economy | Low unemployment rate

2023 Economic Performance

- GDP : S\$673 Bn (USD 501 Bn)
- Per Capita: S\$ 113,779 (USD 84,714)
- Unemployment: 2.0%
- Knowledge-based & Digital Economy
- Manufacturing Sector: 18.6% of GDP

SINGAPORE'S ECONOMIC DEVELOPMENT

Historical Focus

- Manufacturing as the growth engine
- Reduce economic dependence on entrepot trade

Challenges Faced

- Global competition
- Resource limitations

Need for Change

- Transition to high-value, knowledge-intensive sectors
- Leverage on high-quality human capital

OUTLINE

- A Glance of Singapore's Economic Development
- **Strategic Drivers for Economic Transformation**
- Key Elements of Competitive Urban Economy
- JTC's Roles and Strategies in Economic Transformation
- Examples of JTC's Projects Supporting Innovation
- Conclusion
- Discussion

STRATEGIC DRIVERS FOR ECONOMIC TRANSFORMATION

Driver 1: Global Competition & Resource Constraints

Intense competition in labour-intensive manufacturing

Limited land and natural resources necessitate efficient, high-return sectors

Driver 2: Economic Diversification & Resilience

Reducing dependency on a single industry

Building a more robust and adaptable economy

Driver 3: Emphasis on Innovation & R&D

Leveraging digitalization and advanced technologies

Investing in human capital and continuous learning

DRIVER 1: GLOBAL COMPETITION & RESOURCE CONSTRAINTS

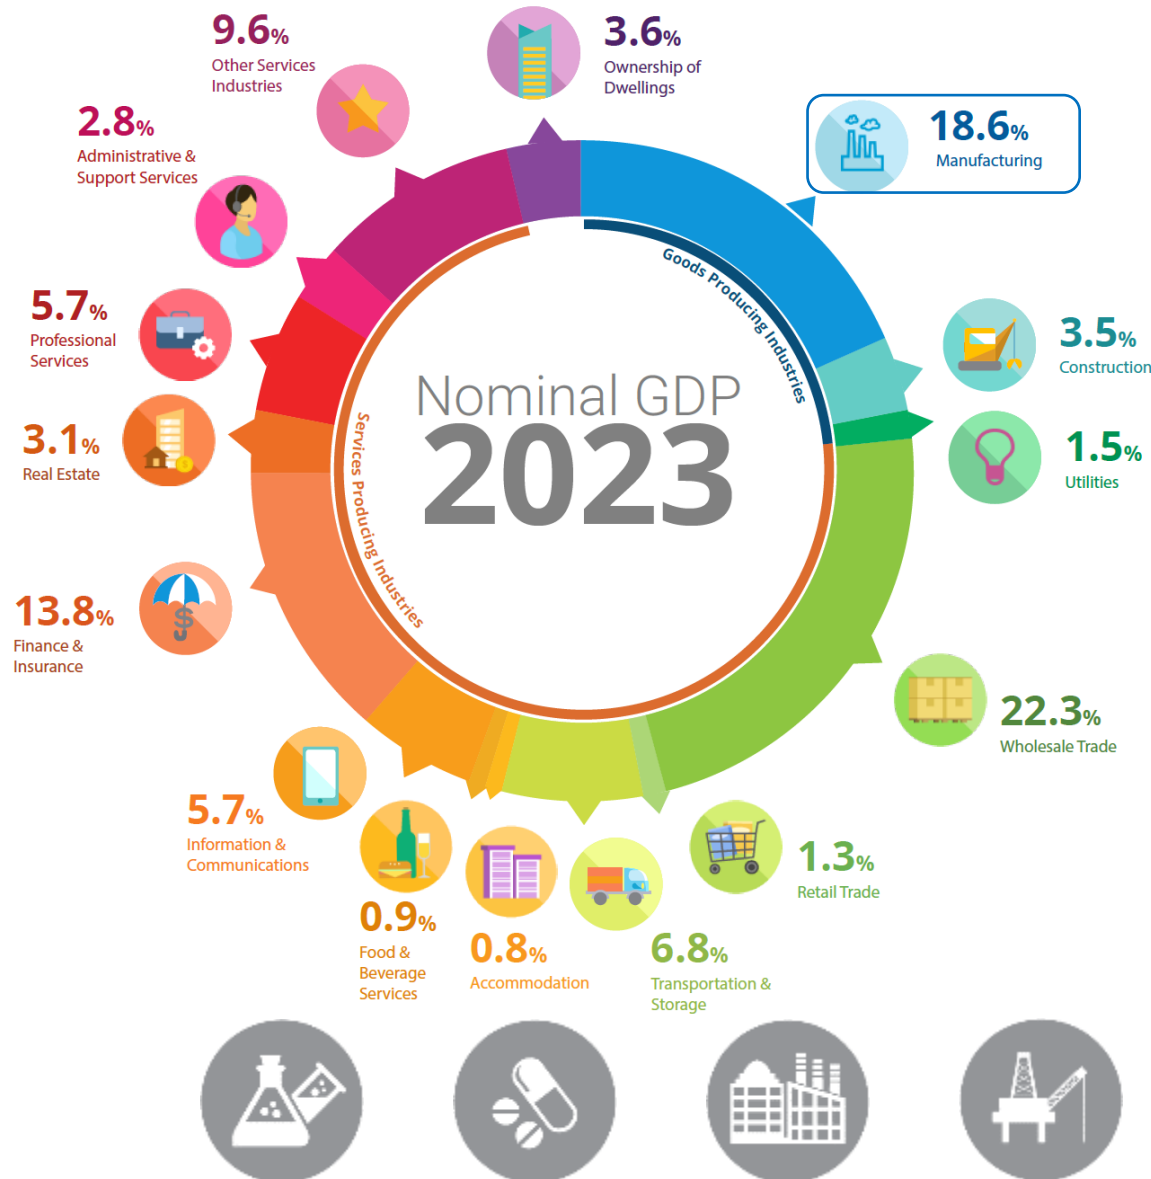

CHALLENGES OF INDUSTRIALISATION

- **Limited Labour Pool**
- **Insufficient Land Area**
- **Small Domestic Market**
- **Lack of Natural Resources**
- **Keen Regional Competition**

APPROACHES TAKEN TO OVERCOME CHALLENGES

DRIVER 2: ECONOMIC DIVERSIFICATION & RESILIENCE

ECONOMIC STRUCTURE

Key Manufacturing Sectors:

- Electronics
- Chemicals
- Biomedicals
- Precision Engineering
- Transport Engineering

DRIVER 2: ECONOMIC DIVERSIFICATION & RESILIENCE

INDUSTRIES & KEY ACTIVITIES

SINGAPORE'S DIVERSE INDUSTRIES FROM AEROSPACE ENGINEERING TO PHARMACEUTICAL BIOTECHNOLOGY:

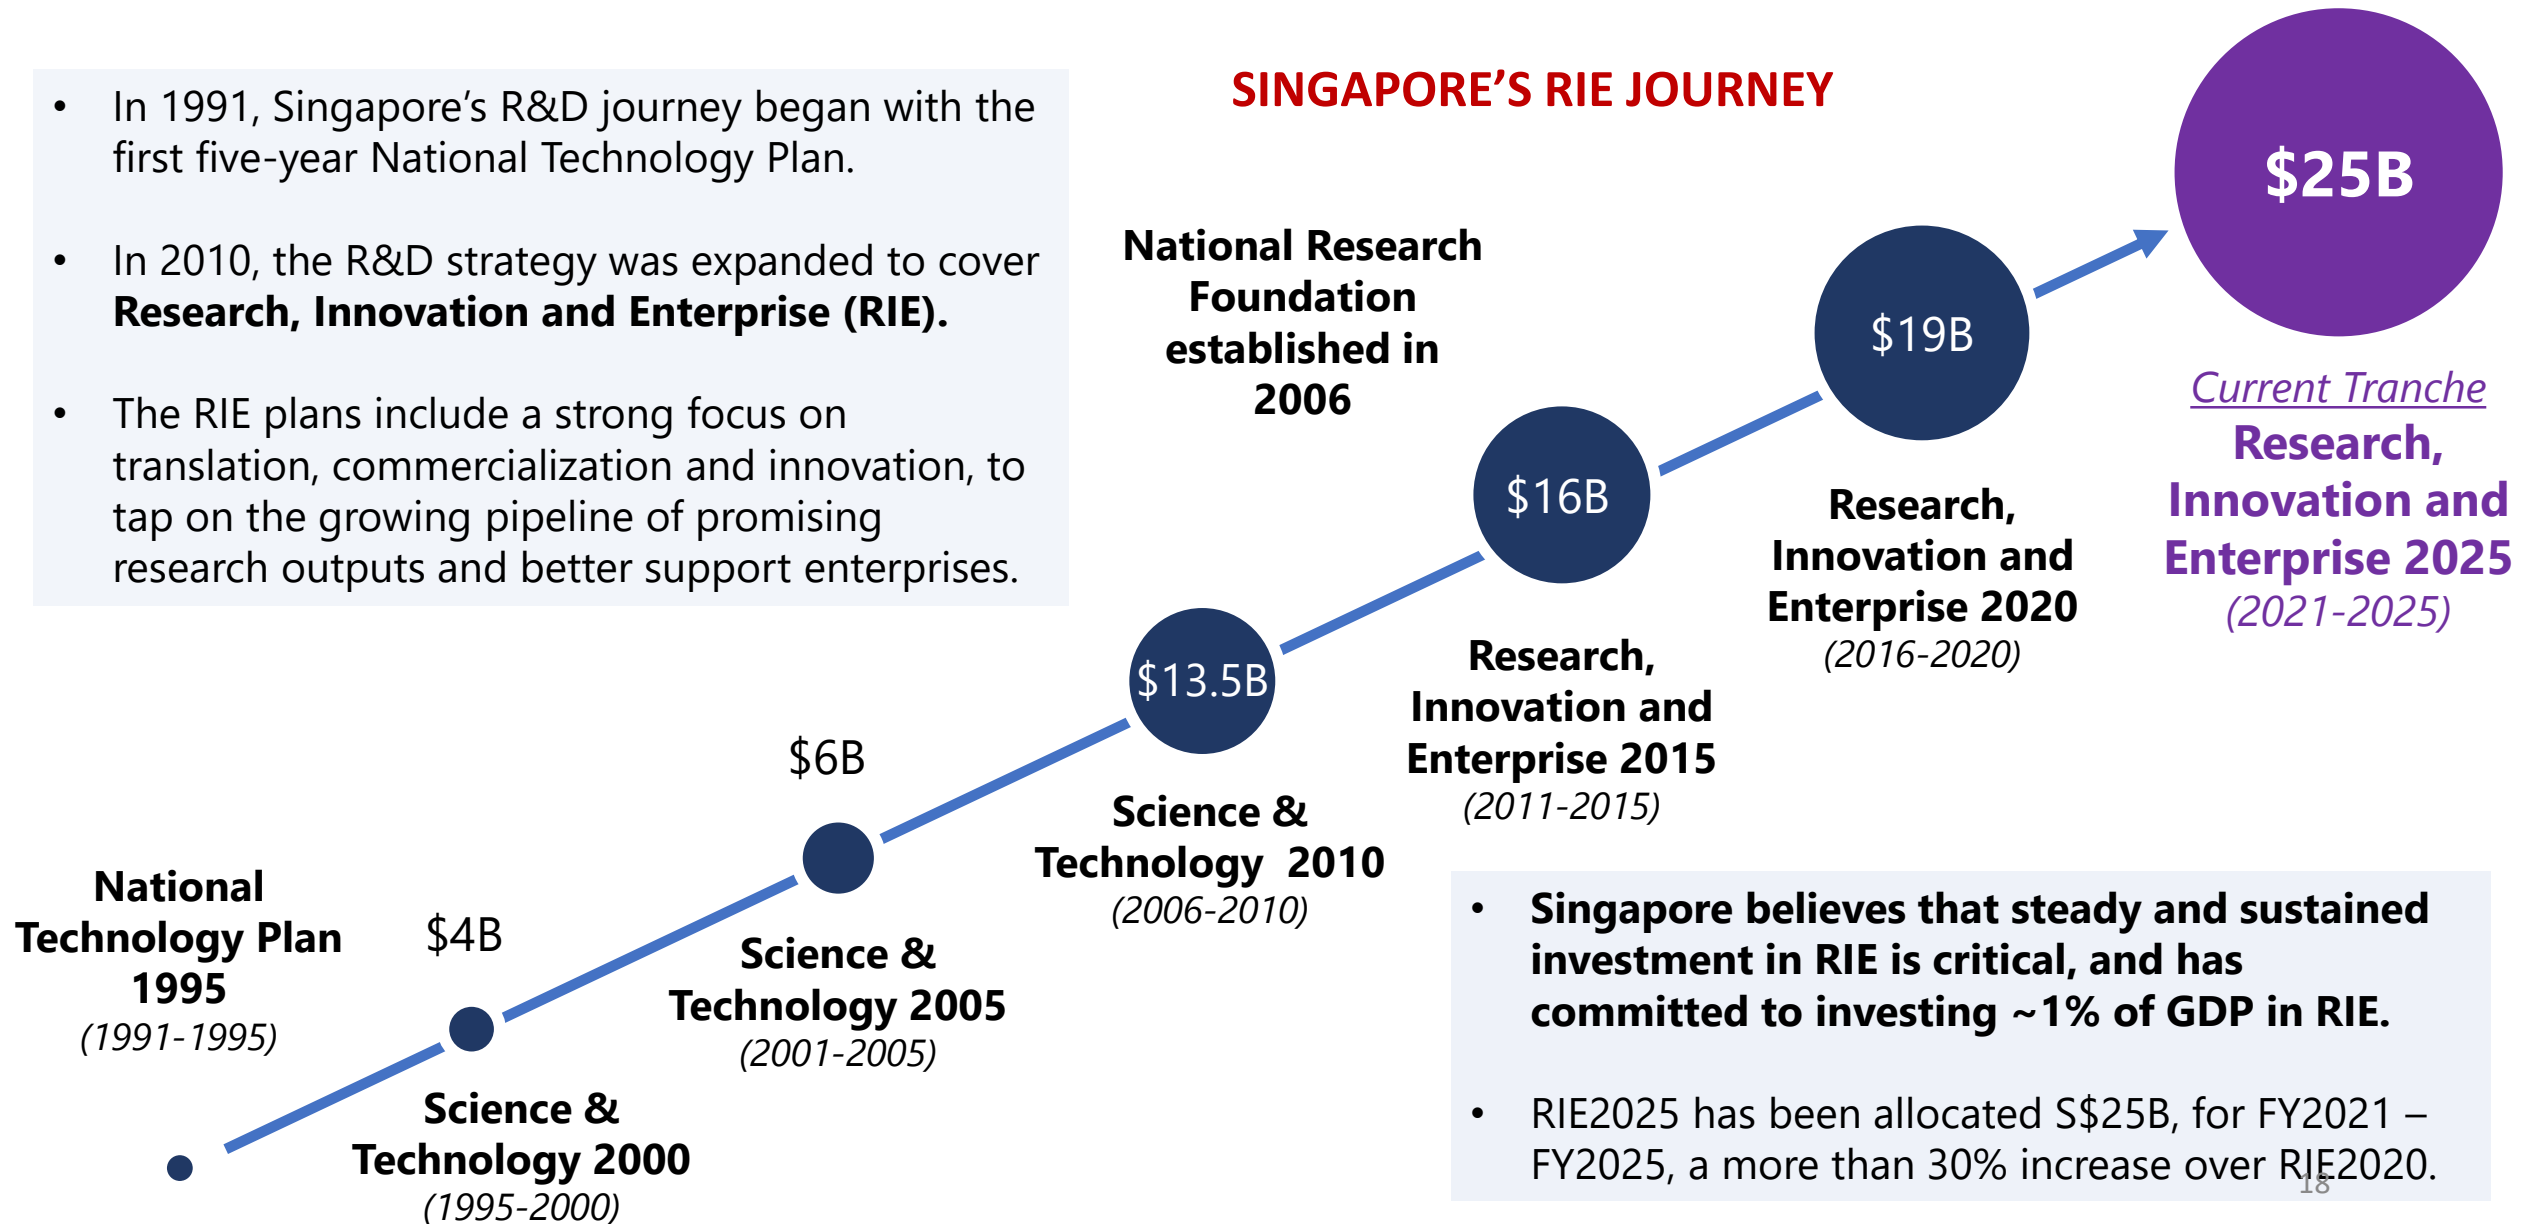

- Aerospace
- Consumer Business
- Creative Industries
- Electronics
- Energy & Chemicals
- Information & Communications Technology
- Logistics & Supply Chain Management
- Medical Technology
- Natural Resources
- Oil & Gas Equipment and Services
- Pharmaceuticals & Biotechnology
- Precision Engineering
- Professional Services
- Urban Solutions & Sustainability

Key Strategy: Diversification

DRIVER 3: EMPHASIS ON INNOVATION & R&D

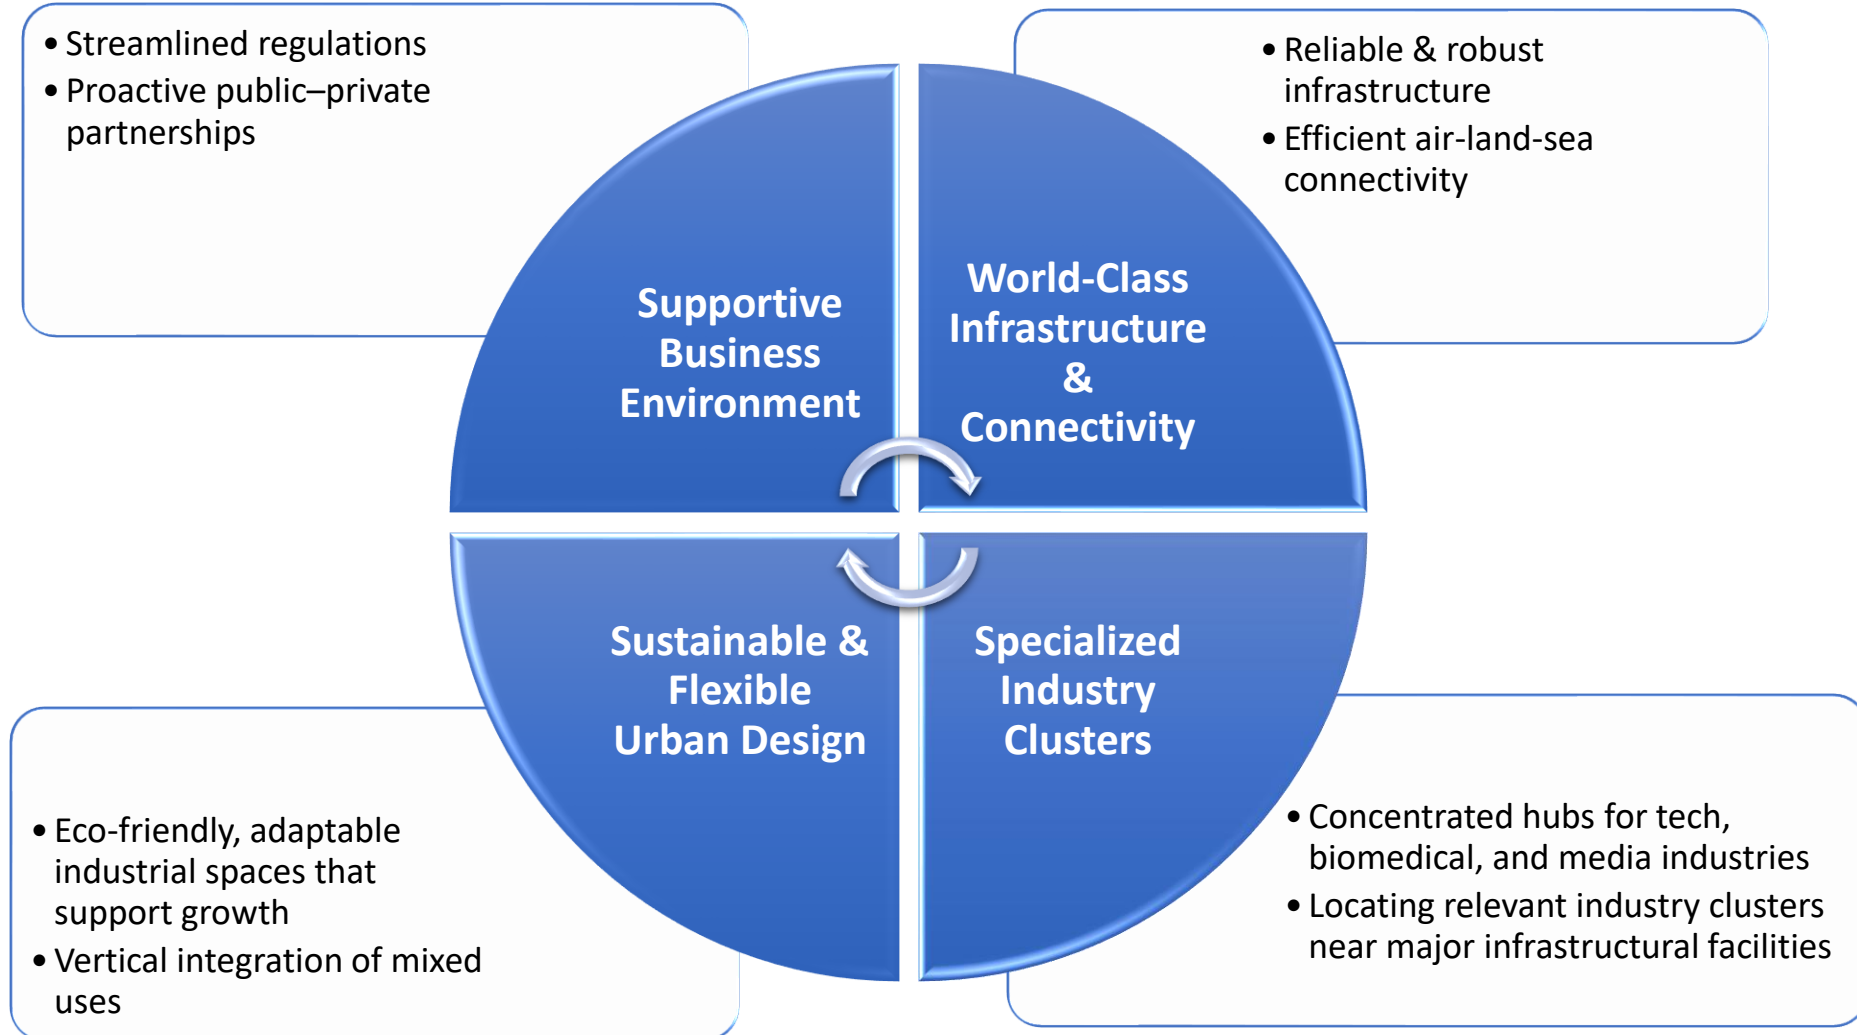

- In 1991, Singapore's R&D journey began with the first five-year National Technology Plan.
- In 2010, the R&D strategy was expanded to cover **Research, Innovation and Enterprise (RIE)**.
- The RIE plans include a strong focus on translation, commercialization and innovation, to tap on the growing pipeline of promising research outputs and better support enterprises.

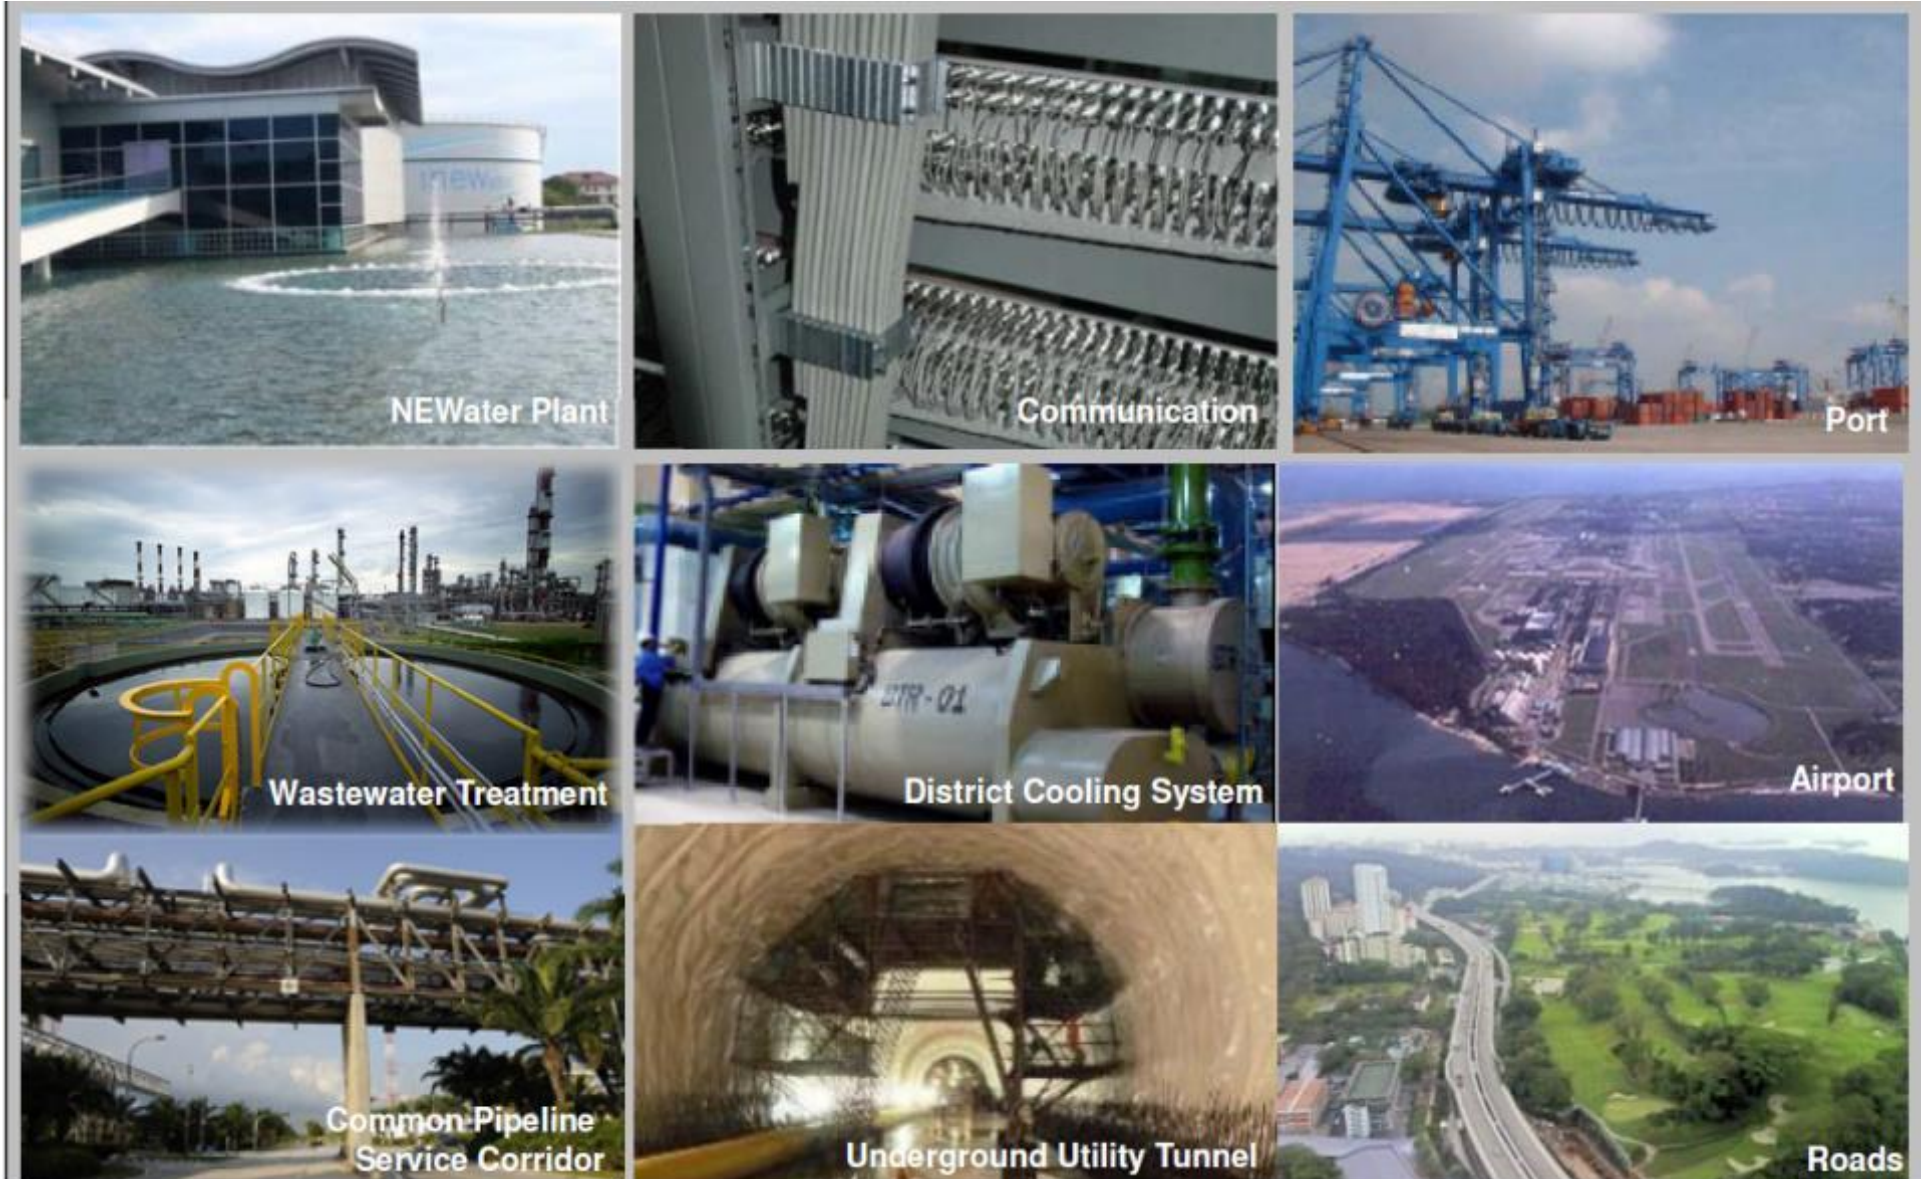

OUTLINE

- A Glance of Singapore's Economic Development
- Strategic Drivers for Economic Transformation

KEY ELEMENTS OF A COMPETITIVE URBAN ECONOMY

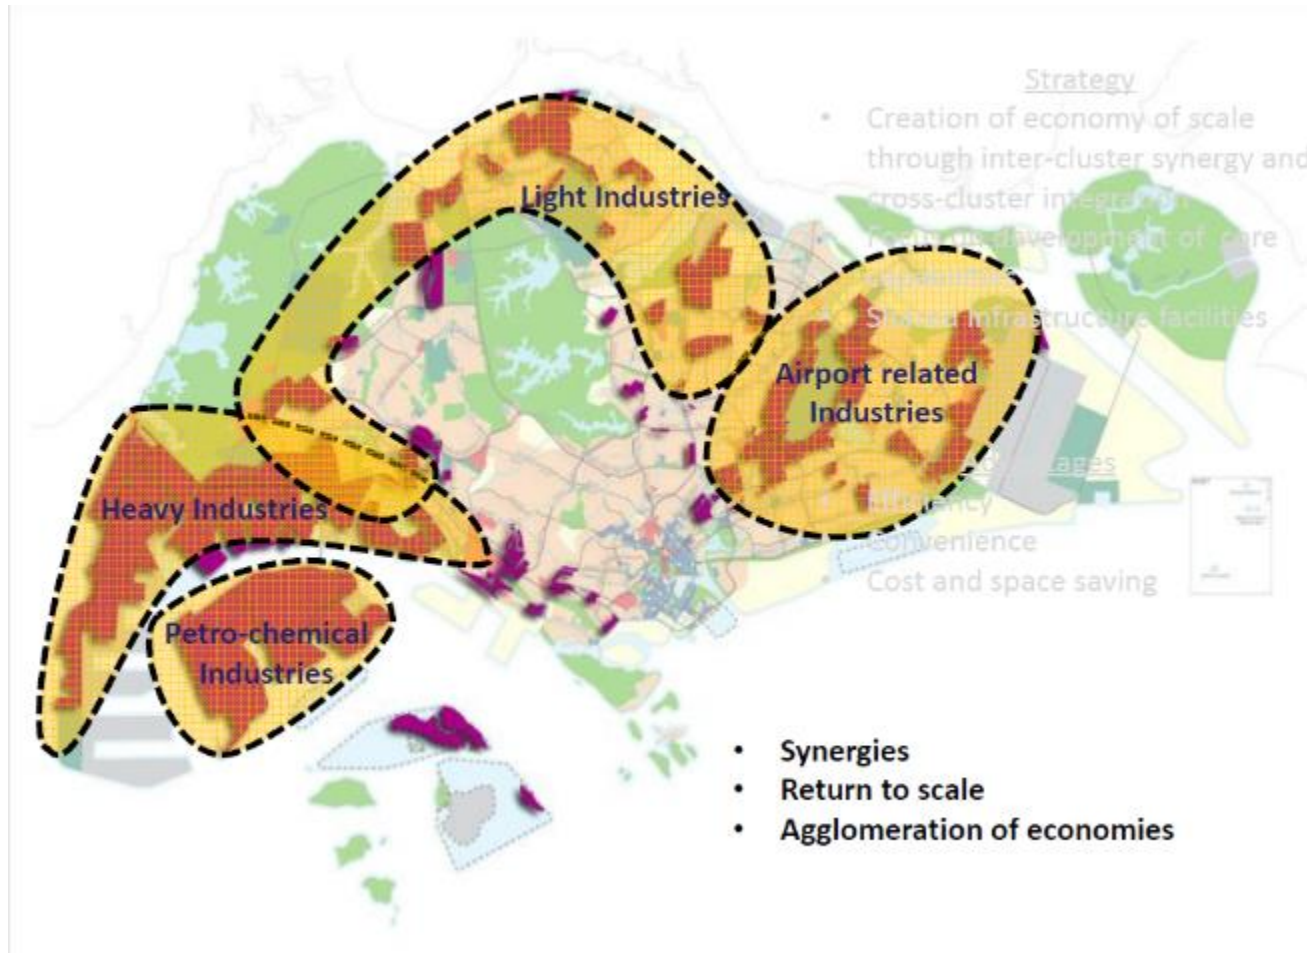

WORLD-CLASS INFRASTRUCTURE & CONNECTIVITY

SPECIALIZED INDUSTRY CLUSTERS

Cluster Land Use

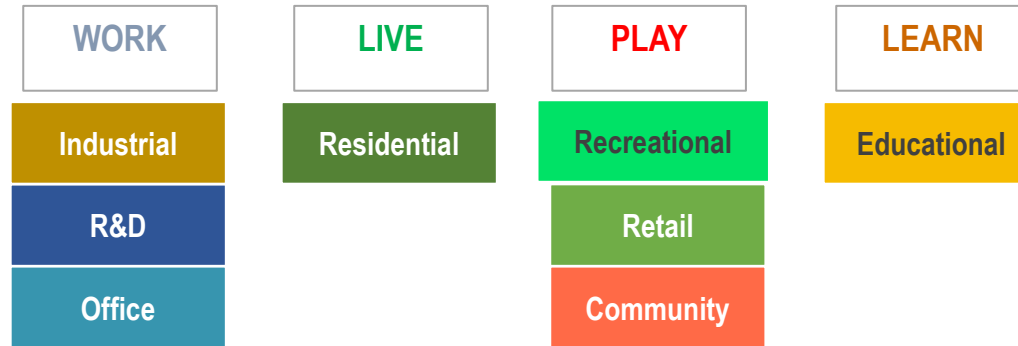

Main Industry Clusters:

1. Aerospace
2. Electronics
3. Precision engineering
4. Food manufacturing
5. Logistics
6. Wafer fabrication
7. Petro-chemicals

SUSTAINABLE & FLEXIBLE URBAN DESIGN

JURONG INNOVATION DISTRICT - ZONING

SUPPORTIVE BUSINESS ENVIRONMENT

Adopting the '4P' Principles to meet customers' needs:

1. Policies
2. Products
3. Price
4. Processes

Tool
Economic Expansion Incentives Act (1967)
Land Acquisition Act (1967)
Employment Act (1968)
Wage Correction Policy (1979 to 1981)

THE IMPLEMENTORS OF INDUSTRIAL PARKS

EDB (Economic Development Board) and **JTC** (Jurong Town Corporation) are the Key agencies for Economic & Industrial Development

EDB is responsible for **planning, marketing and executing strategies to make Singapore a global hub for business and investment** across manufacturing and internationally traded services.

JTC is responsible for **planning, promoting developing and managing the industrial parks, infrastructure and amenities.**

ECONOMIC DEVELOPMENT BOARD

MISSION

To create sustainable economic growth, with vibrant business and good job opportunities for Singapore

ROLE

Responsible for strategies that enhance Singapore's position as a global centre for business, innovation, and talent

KEY FOCUS AREAS

Undertake investment promotion and industry development in the manufacturing and internationally tradeable services sectors

Engage Singapore's existing companies to transform their operations and boost productivity, and to generate growth in adjacent and disruptive areas by growing new businesses out of Singapore

Work with companies by providing information, connection to partners and access to government incentives for investments, as well as their transformation and growth initiatives

Work with other Singapore government agencies to improve pro-business environment, and ensure that industries are supported by a globally competitive workforce through talent development

JTC - INDUSTRIAL PARK DEVELOPER

MISSION

To develop industrial infrastructure to catalyse the growth of new industries and transform existing enterprises

ROLE

To provide land, space and information to support industries and enterprises

KEY FOCUS AREAS

Develop Innovative & Flexible Spaces

- *Develop specialised & clustered facilities*
- *Create flexible spaces*

Master Develop Next Generation Estates

- *Plan, develop & manage mixed-use estates*
- *Act as place-maker to enhance vibrancy and connectivity of public spaces*

Optimise Land Use

- *Recycle & recover land*
- *Explore alternative approaches – underground spaces, air rights & floating platforms*

Drive Innovation & Productivity

- *Aggregate demand & enhance productivity of construction & facilities management*
- *Enable enterprises to test-bed innovations via Open Innovation Calls*

JTC's Key Processes

EVOLUTION OF INDUSTRIAL PARKS

*What new challenges will
Singapore face?*

INDUSTRIAL INFRASTRUCTURE CHALLENGES

Resources

- Land constraints
- Lack of natural resources

Economy

- Manufacturing
- Servitization

Human

- Worker profile
- Changing workforce expectations

Environment

- Sustainability and liveability
- Reduction of carbon emission
- **Pandemics!**

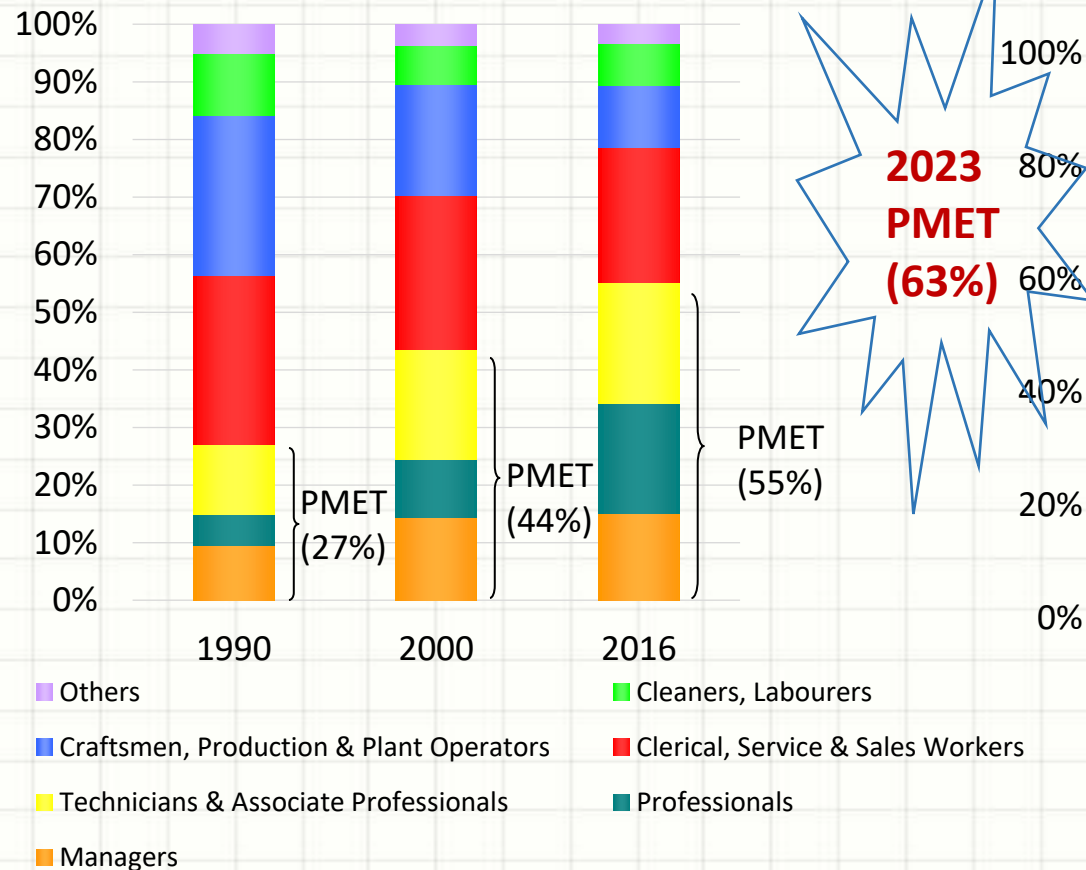

Technology

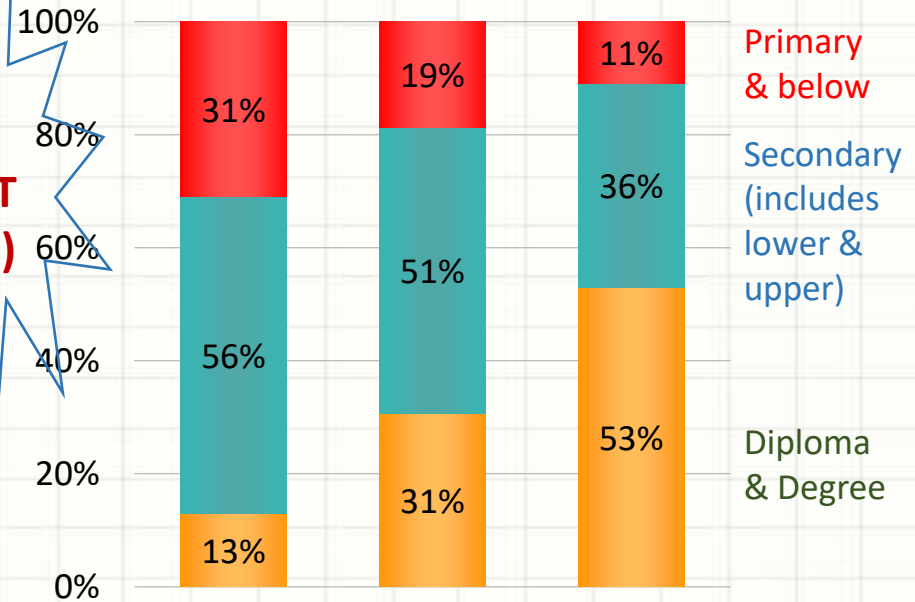

- Disruptive technologies
- New business models
- Artificial Intelligence

CATERING TO CHANGING WORKFORCE EXPECTATIONS

From bringing people to jobs

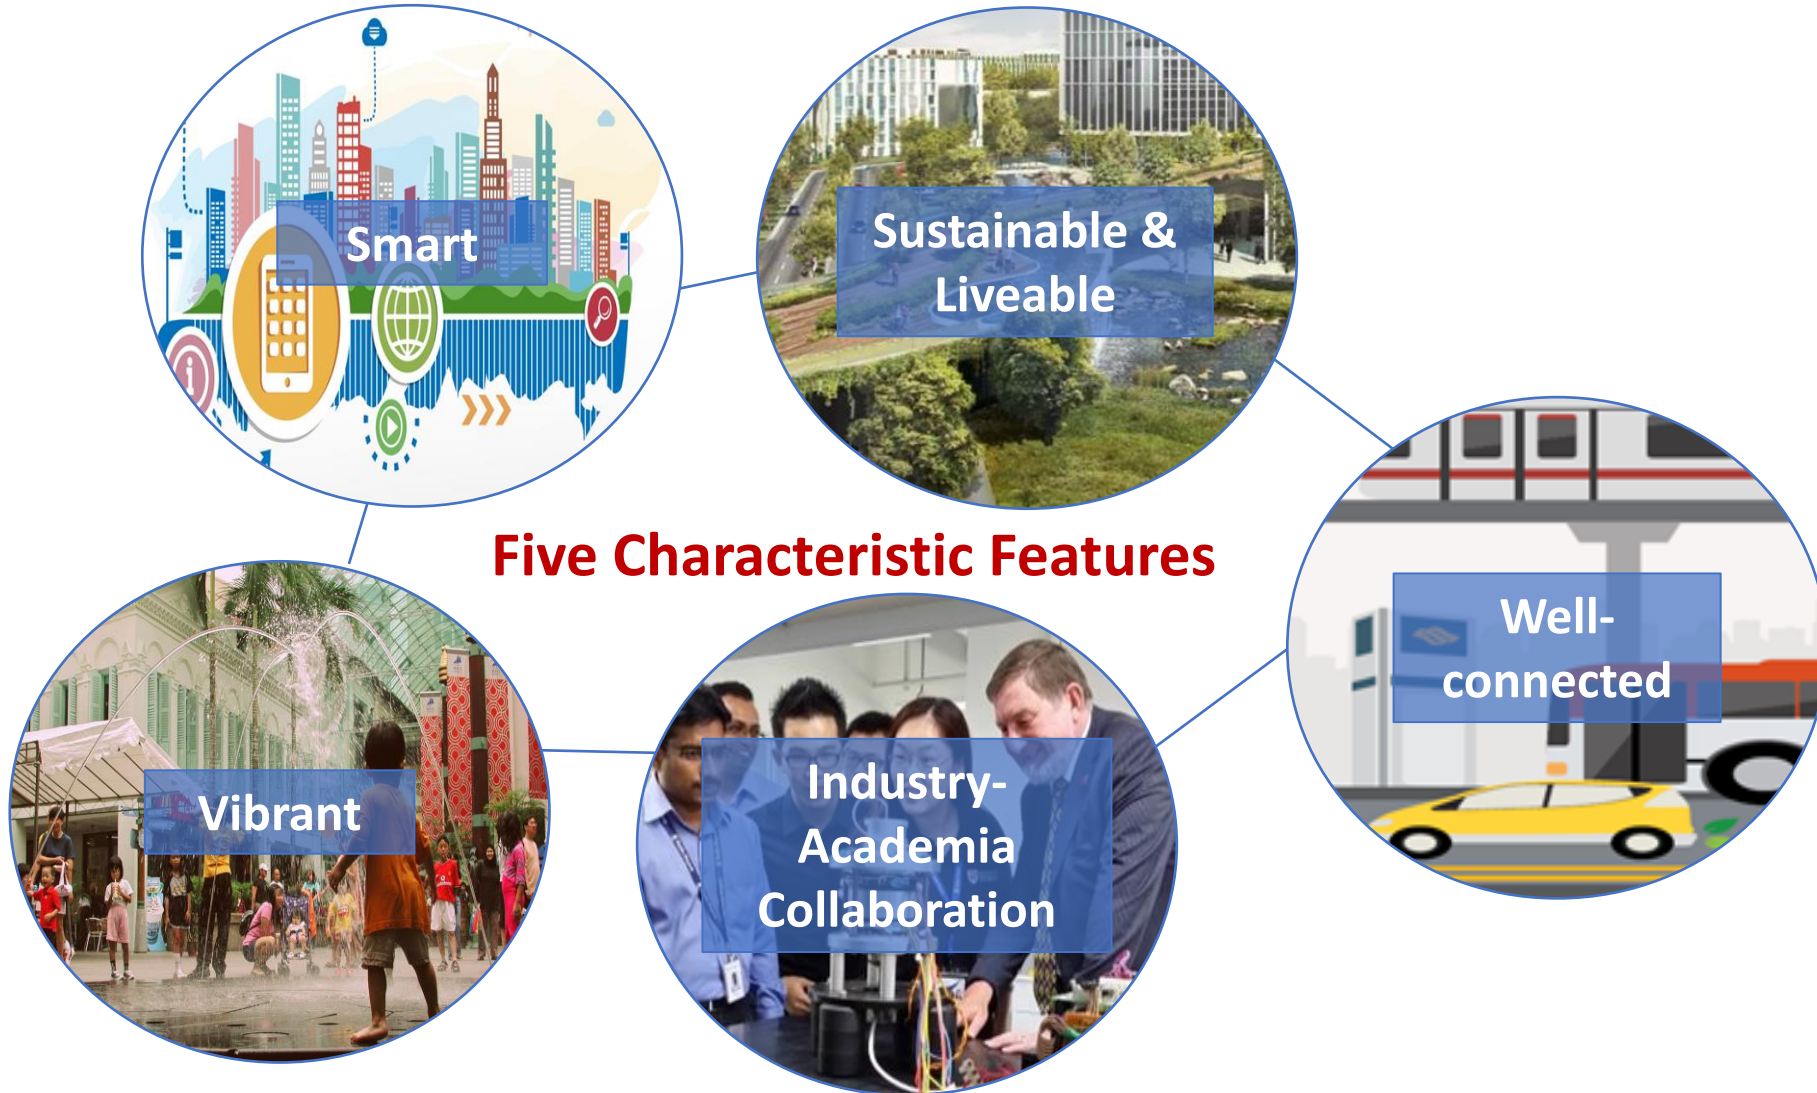

Future

To bringing jobs to people

NEW GENERATION INDUSTRIAL SPACE

What are mixed-use districts?

RESPONDING TO A CHANGING ECONOMIC LANDSCAPE

Change: Growth of services

Change: Servitization of manufacturing

How does Singapore cater to these changes?

Moving from industrial space to economic space?

TRANSITION FROM MANUFACTURING TO KNOWLEDGE-BASED ECONOMY

Value Chain Upgrading

- Transition from basic manufacturing to advanced production in sectors like electronics, aerospace, biotechnology, and advanced materials.
- Emphasis on R&D, automation, and process innovation.

Digital Integration

- Adoption of smart manufacturing, IoT, and data analytics to enhance productivity and product quality.
- Creation of dynamic, tech-driven industrial ecosystems.
- Eg: Digital backbone “Open Digital Platform” (OPD) of Punggol Digital District

Talent & Innovation

- Investing in education and skills development to support high-tech industries.
- Developing urban ecosystem to attract global talent and foster continuous innovation
- Eg: RIE 2025, JTC LaunchPads for Start-ups

JTC'S TRANSFORMATIVE ROLE

- **Evolution of Industrial Estates:**
 - Transitioning from traditional industrial parks to innovation hubs
- **Innovation Ecosystems:**
 - Creating clusters that integrate R&D, startups, and corporate ventures (e.g., one-north)
- **Facilitating Collaboration:**
 - Designing spaces that encourage knowledge sharing and synergy between industries

JTC'S ROLE: RESPONSIVE INDUSTRIAL DEVELOPMENT

2016 Next Generation Park: Jurong Innovation District

JTC'S ROLE TODAY

Looking at other areas to keep pace with emerging trends

Master Developer

**Flexible Space
Provider**

**Place-Maker &
Community
Builder**

JTC'S ROLE TODAY

Focusing on next-generation industrial estates and mixed-use districts

A Master Developer goes beyond providing infrastructure

- **Integrate mixed uses** in one estate to **create a work-live-play-learn** environment
- **Provide** sustainable, liveable, connected & smart **solutions** for the estate
- **Test-bed & integrate** new ideas, technologies & land/space typologies
- **Foster** a vibrant community through **placemaking** initiatives

INNOVATION HUBS DRIVEN BY JTC

Figure SC4.1: Our future city

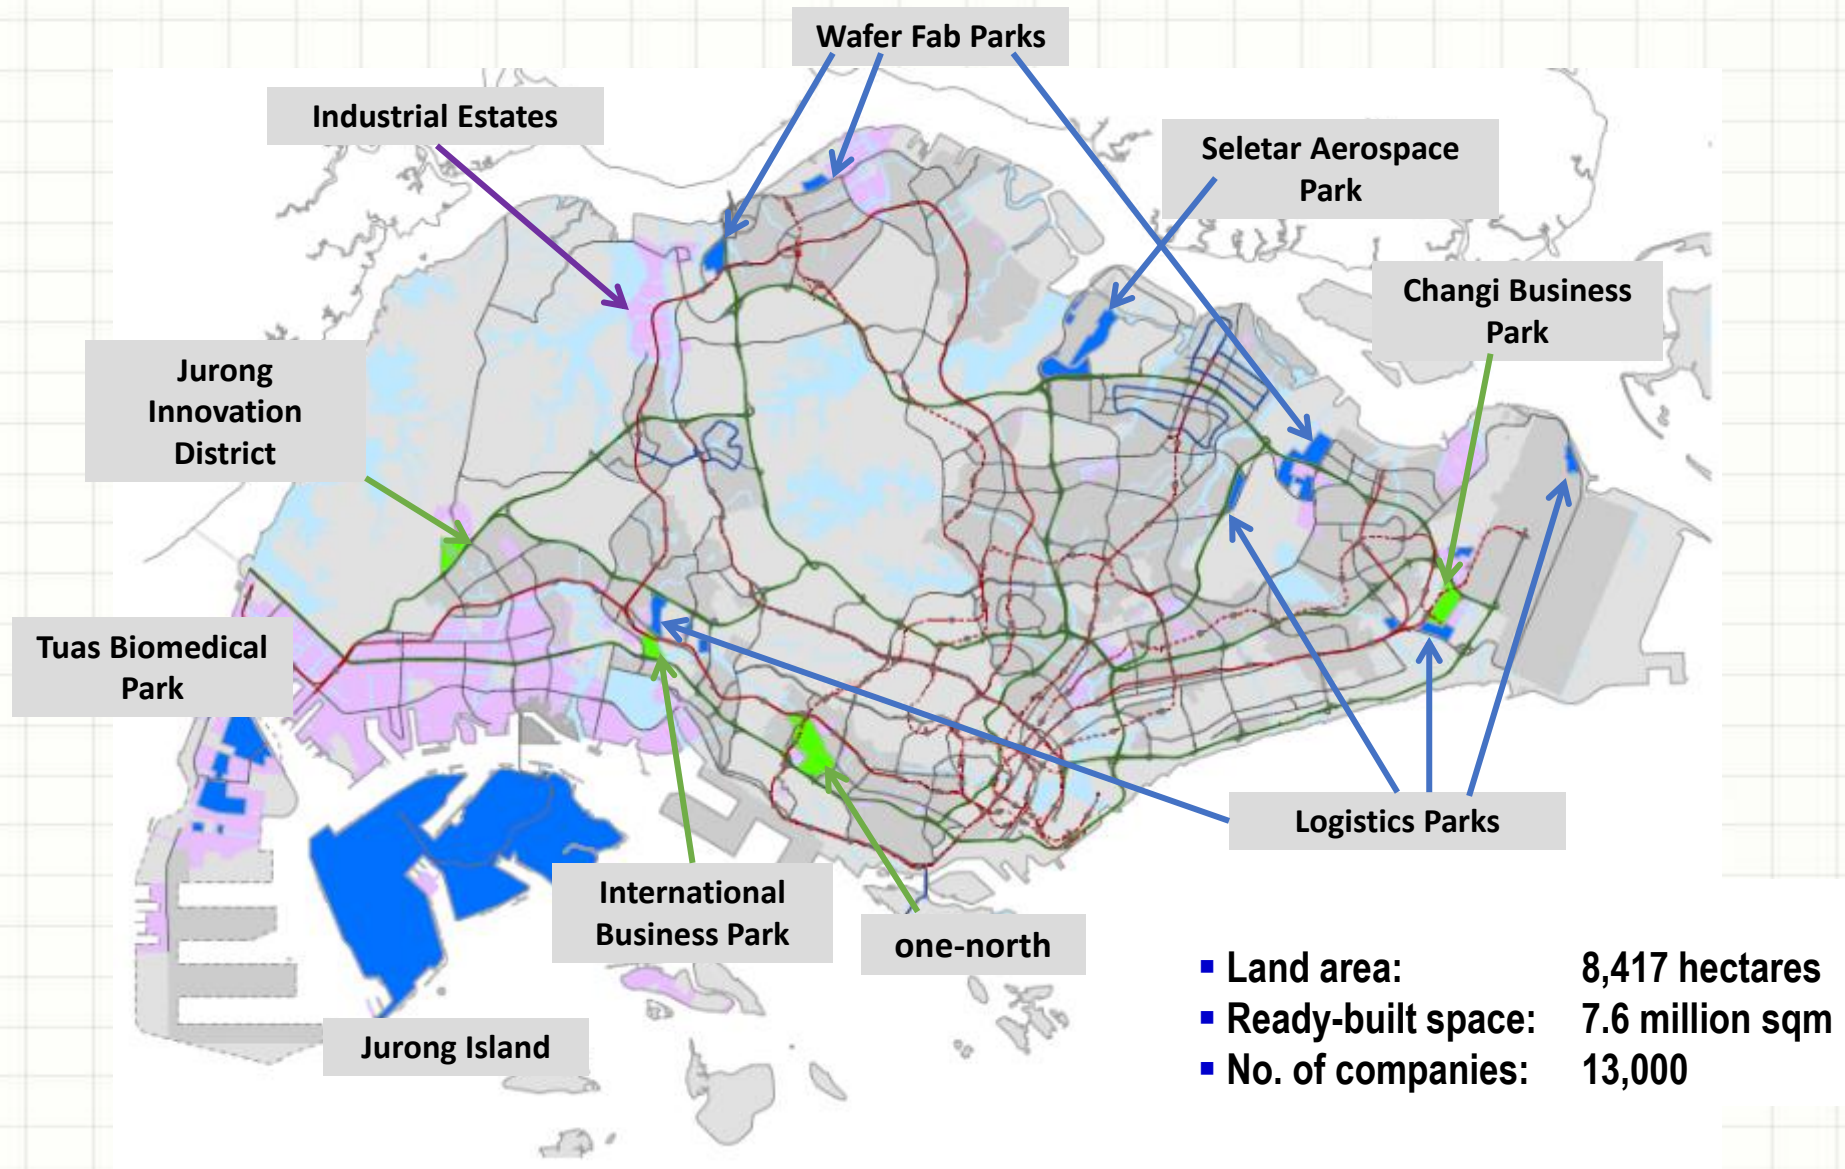

SINGAPORE: FUTURE CITY

Our future city will play the important role of providing the necessary space and infrastructure for our economy to grow and evolve, and in creating an endearing home for Singaporeans. Our urban development plans must respond to the future challenges.

Several major plans for Singapore's urban transformation are already in place, but there is still much to be done. There is still more space in our island for future developments and we can all play a part in building a better Singapore for the future.

JTC'S PORTFOLIO

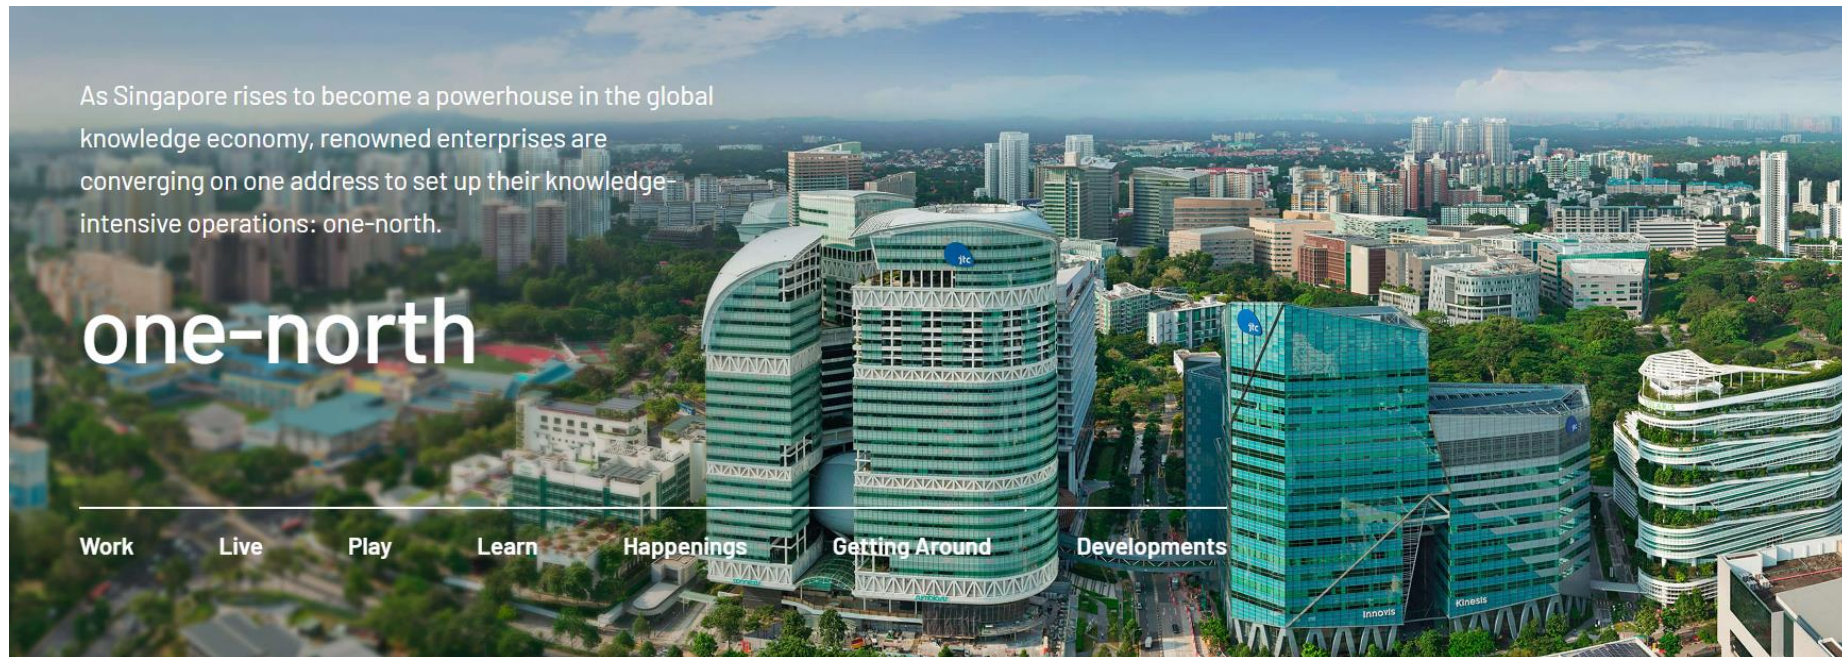

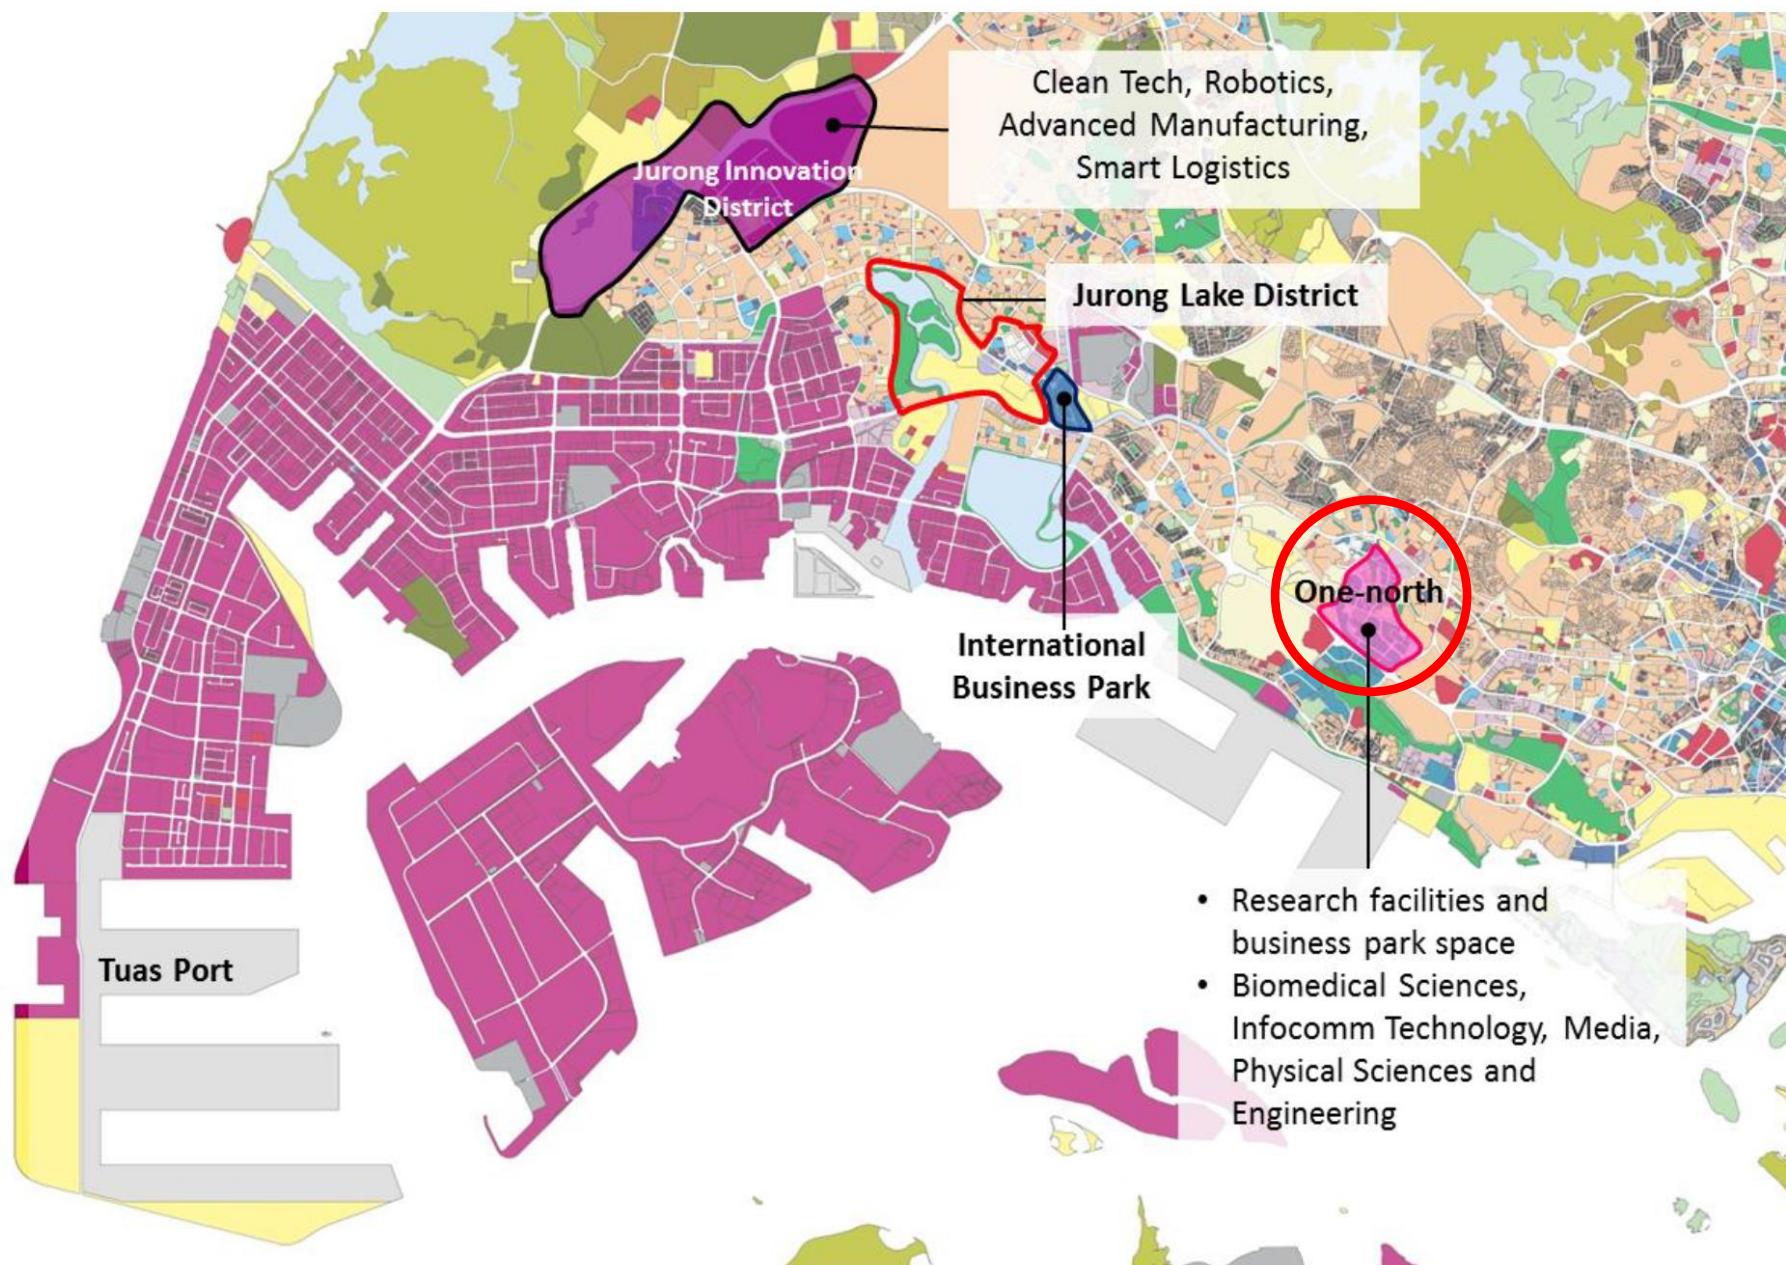

OUTLINE

Example 1: one-north Development

Shaping a Work-Live-Play-Learn Knowledge Landscape

one-north Development

— Shaping a Work-Live-Play-Learn Knowledge Landscape

Area: 200 Ha

Location: Buona Vista near the National University of Singapore

Concept: “city within a city”

- An ecosystem-like industrial landscape
- Work-Live-Play-Learn community
- House researchers, technopreneurs and scientists

one-north Development

Development Objective :

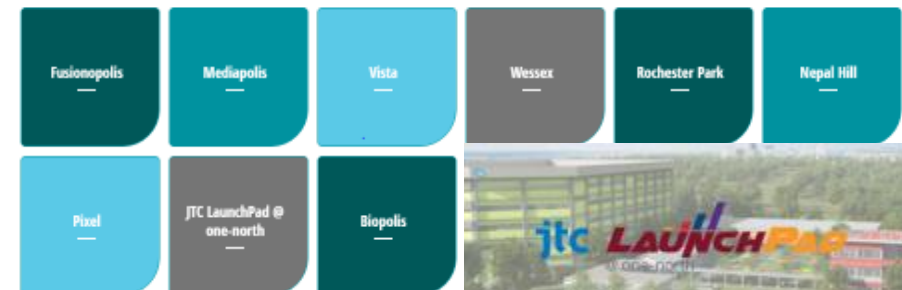

- Support and facilitate innovation and enterprise in high-growth knowledge clusters

Development Master Plan :

- Biopolis (Biomedical sciences and life sciences)
- Fusionopolis (Infocomm technology, science and engineering)
- Mediapolis (Media related industries)
- Vista (corporate & business support)
- LaunchPad (incubation & start-up)

Developments Under

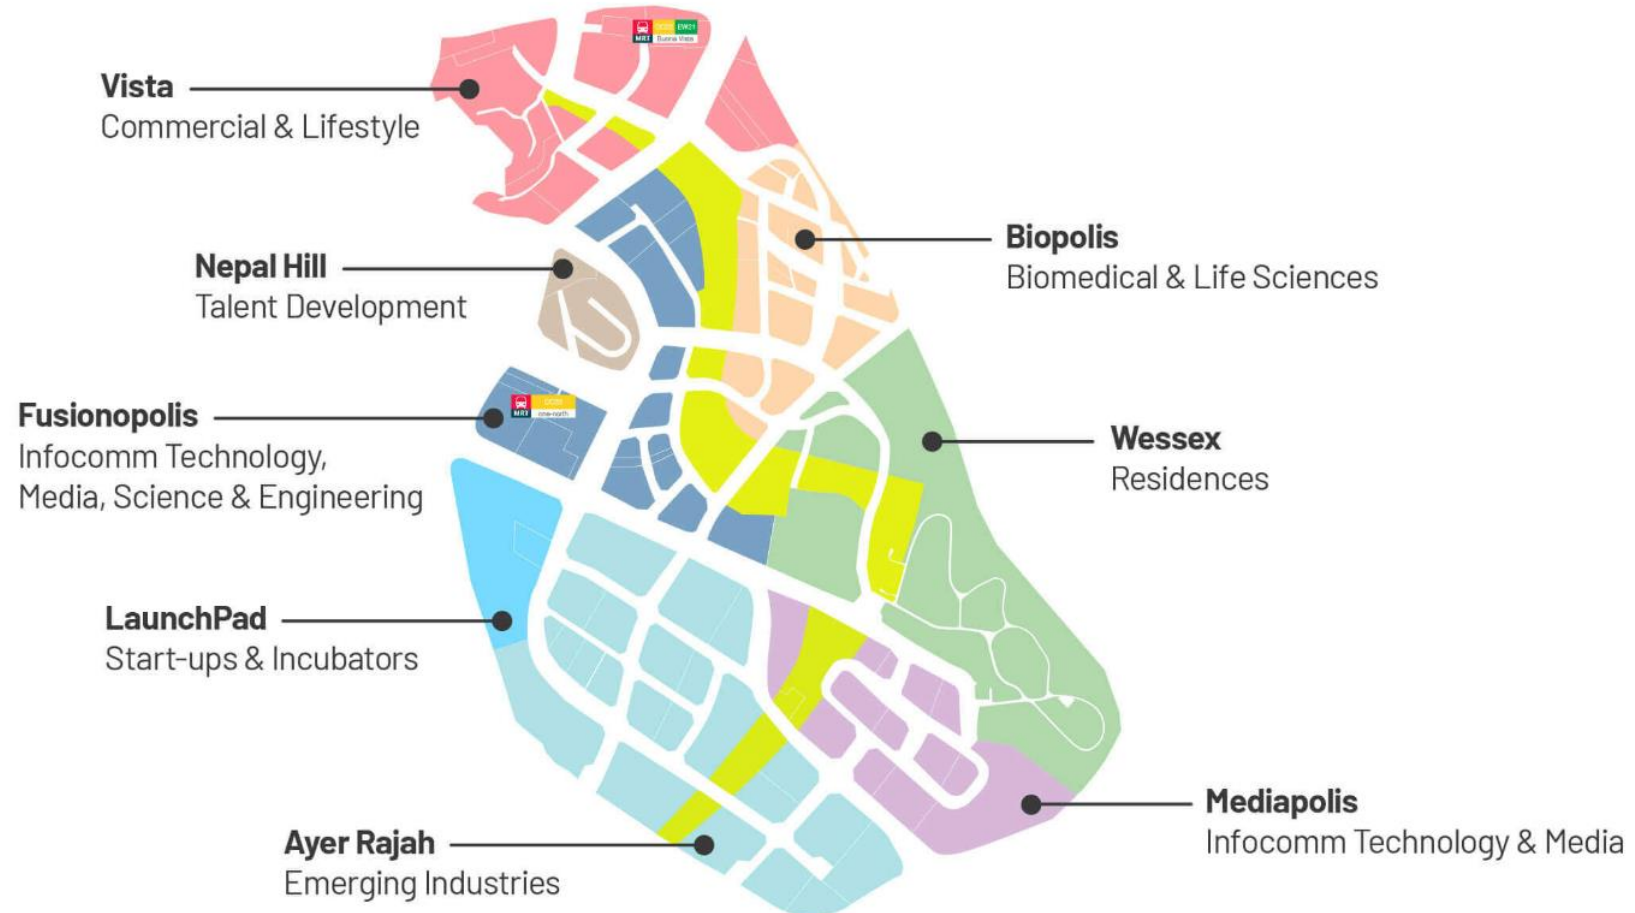

CONCEPT: WORK-LIVE-PLAY-LEARN

Talents & Knowledge-Based Economy Eco-system:

- **Provide** good infrastructure
- **Make the place liveable**
- **Attract** global investors and mobile talents

8 PRECINCTS OF ONE-NORTH DEVELOPMENT

one-north | **Work**, Live, Play, Learn

Biopolis - Biomedical sciences

Fusionopolis - ICT, media, science & engineering

Mediapolis – Media

A Community of Enterprise, Innovation & Partnership

SUPPORTING AGENCIES

The Agency for Science, Technology and Research (A*STAR) **drives mission-oriented research**, nurtures and develops talent and leaders

JTC Corporation is responsible for the **development of industrial infrastructure** to support and catalyse the growth of industries and enterprises in Singapore.

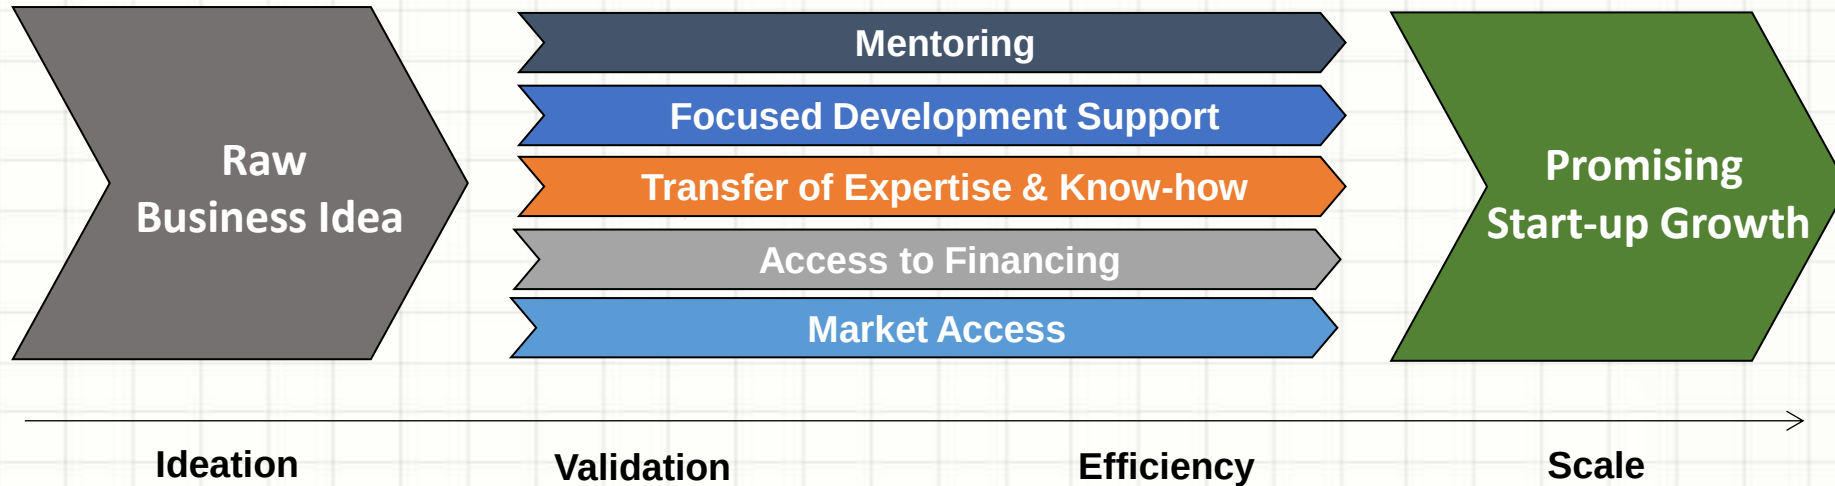

Enterprise Singapore (ESG) **helps Singapore enterprises grow and builds trust in Singapore products and services**, also helps enterprises in financing, capability and management development, technology and innovation, and access to markets.

Action Community for Entrepreneurship (ACE) **fosters Singapore into a creative and entrepreneurial nation** to translate innovation and enterprise into wealth creation.

JTC LaunchPad @one-north

Incubation of Start-ups

NETWORK OF INCUBATORS

50 Incubators Catalysing the Growth of Start-ups

Biomed/ Medtech

ICT & Media

Hardware

FAST GROWING START-UPS

Carousell

- Founded in 2012
- SEA's largest & fastest growing mobile P2P marketplaces
- > 8 million listings, average transactions every minute
- Raised US\$35 million (Series A) in Aug 2016

99.co

- Founded in 2014
- Singapore's fastest growing property portal for residential rental and sales
- Raised \$2.7 million to date, including Eduardo Saverin
- Valued at US\$8 million

Tackatack

- Founded in 2009
- e-retail solution with social commerce capabilities that empowers individuals and businesses to sell across web, social media and mobile
- Acquired by Philippines Telco PLDT for US\$5million in Aug 2015

Shopback

- Founded in 2014
- E-commerce startup offering cashback for online stores
- Expansion into Malaysia, Philippines and Indonesia
- Estimated US\$4 million revenue for 2016

Lynx Analytics

- Founded in 2010
- Big data analytics startup originating from INSEAD
- Focused on providing data analysis using graph theory to telecom, mobile, financial and advertising industries
- Raised US\$10 million in 2016, currently valued at US\$66 million

KEY PLAYERS at one-north

Biopolis:

one-north at a glance

one-north has grown over the past 16 years.
Here's a quick glance at the developments to date!

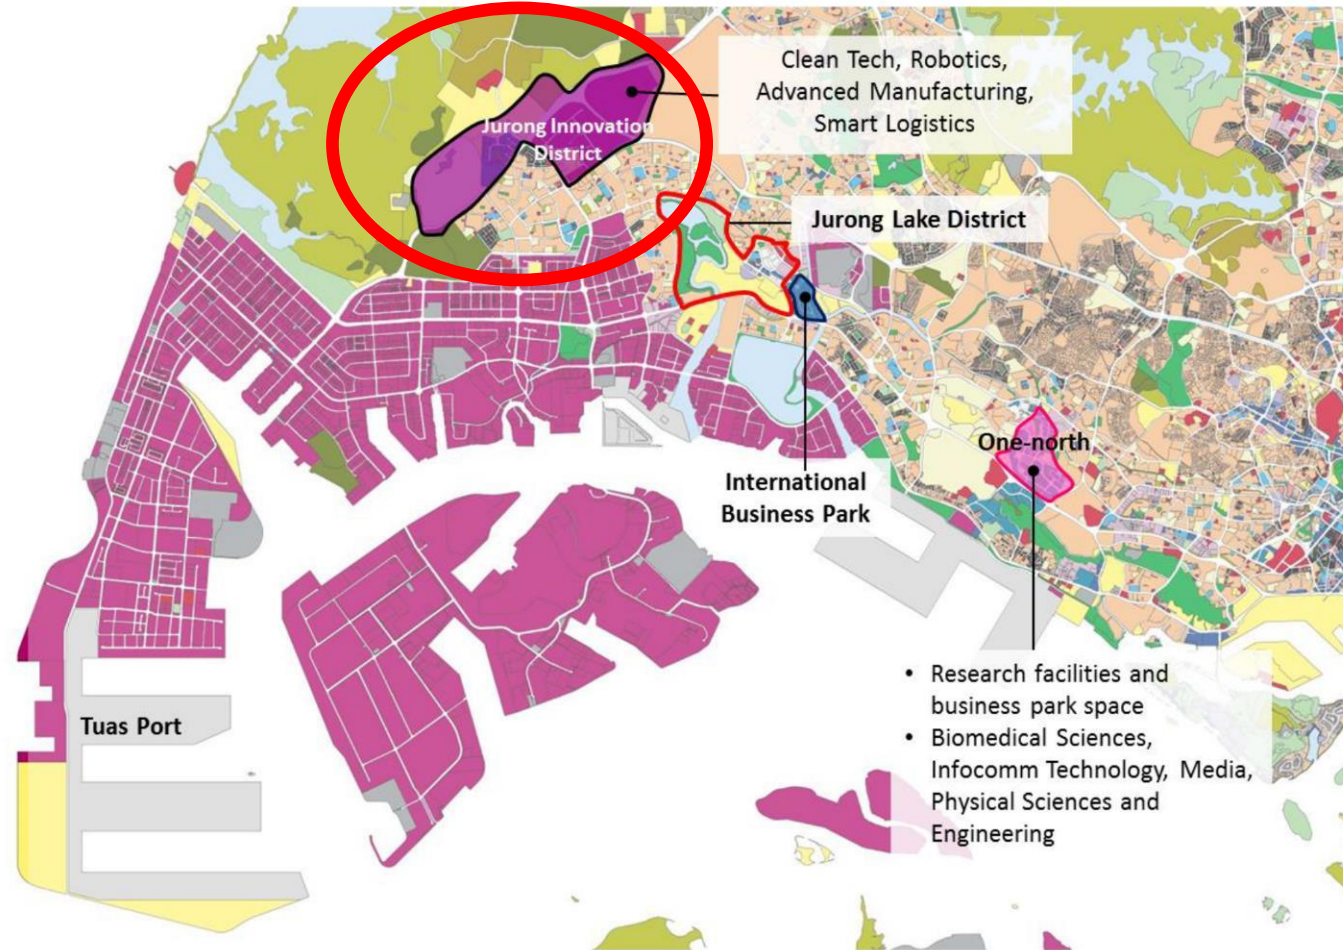

Example 2:

Jurong Innovation District

A globally competitive and comprehensive innovation hub

JURONG INNOVATION DISTRICT

JURONG INNOVATION DISTRICT

Vision of JID

To be a globally competitive and comprehensive innovation hub that attracts global leaders in technology, manufacturing, and R&D, and leverages Singapore's strengths in science, technology, engineering, and manufacturing

- JID aims to provide a one-stop hub for businesses and the community to ***ideate, innovate, and create***, with access to R&D centres, technology partners, training providers, and factories of the future
- JID also seeks to foster a ***vibrant and sustainable living and working environment***, with green spaces, underground logistics networks, smart mobility solutions, and social amenities

JURONG INNOVATION DISTRICT – KEY PARAMETERS

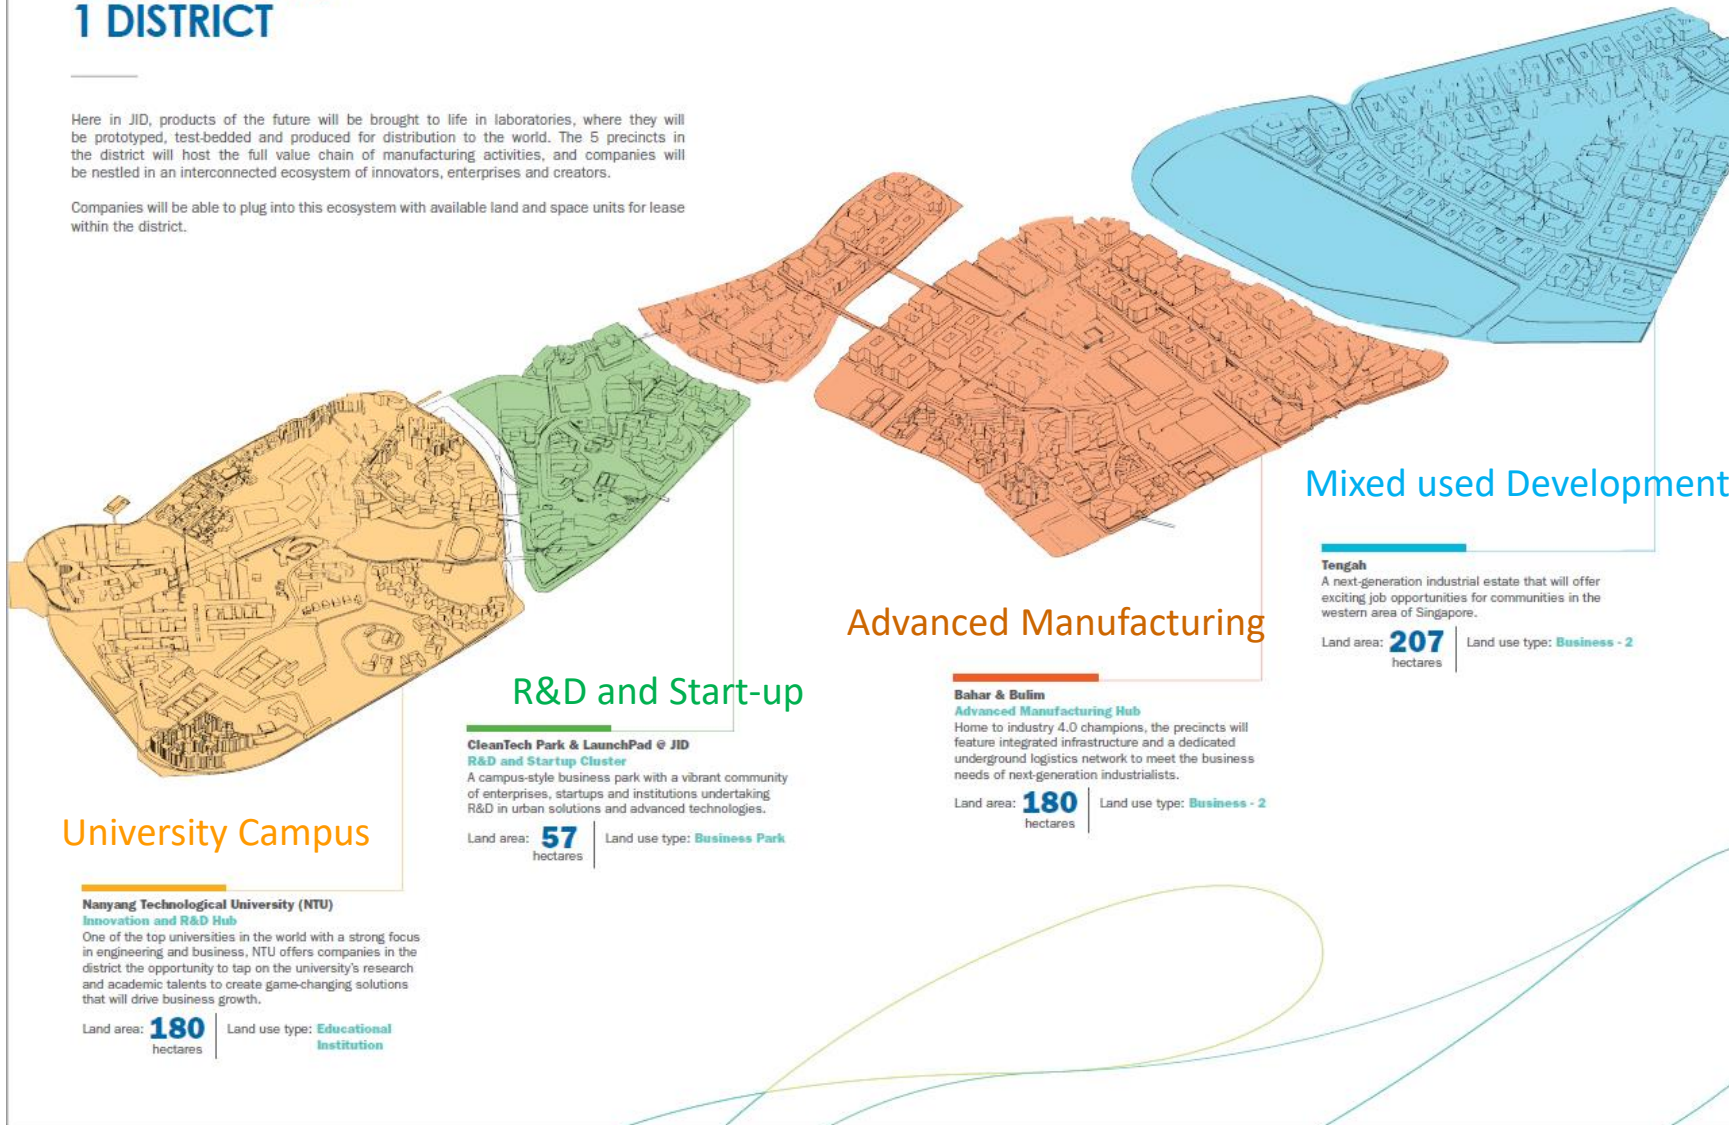

JURONG INNOVATION DISTRICT - CONCEPT

5 PRECINCTS, 1 DISTRICT

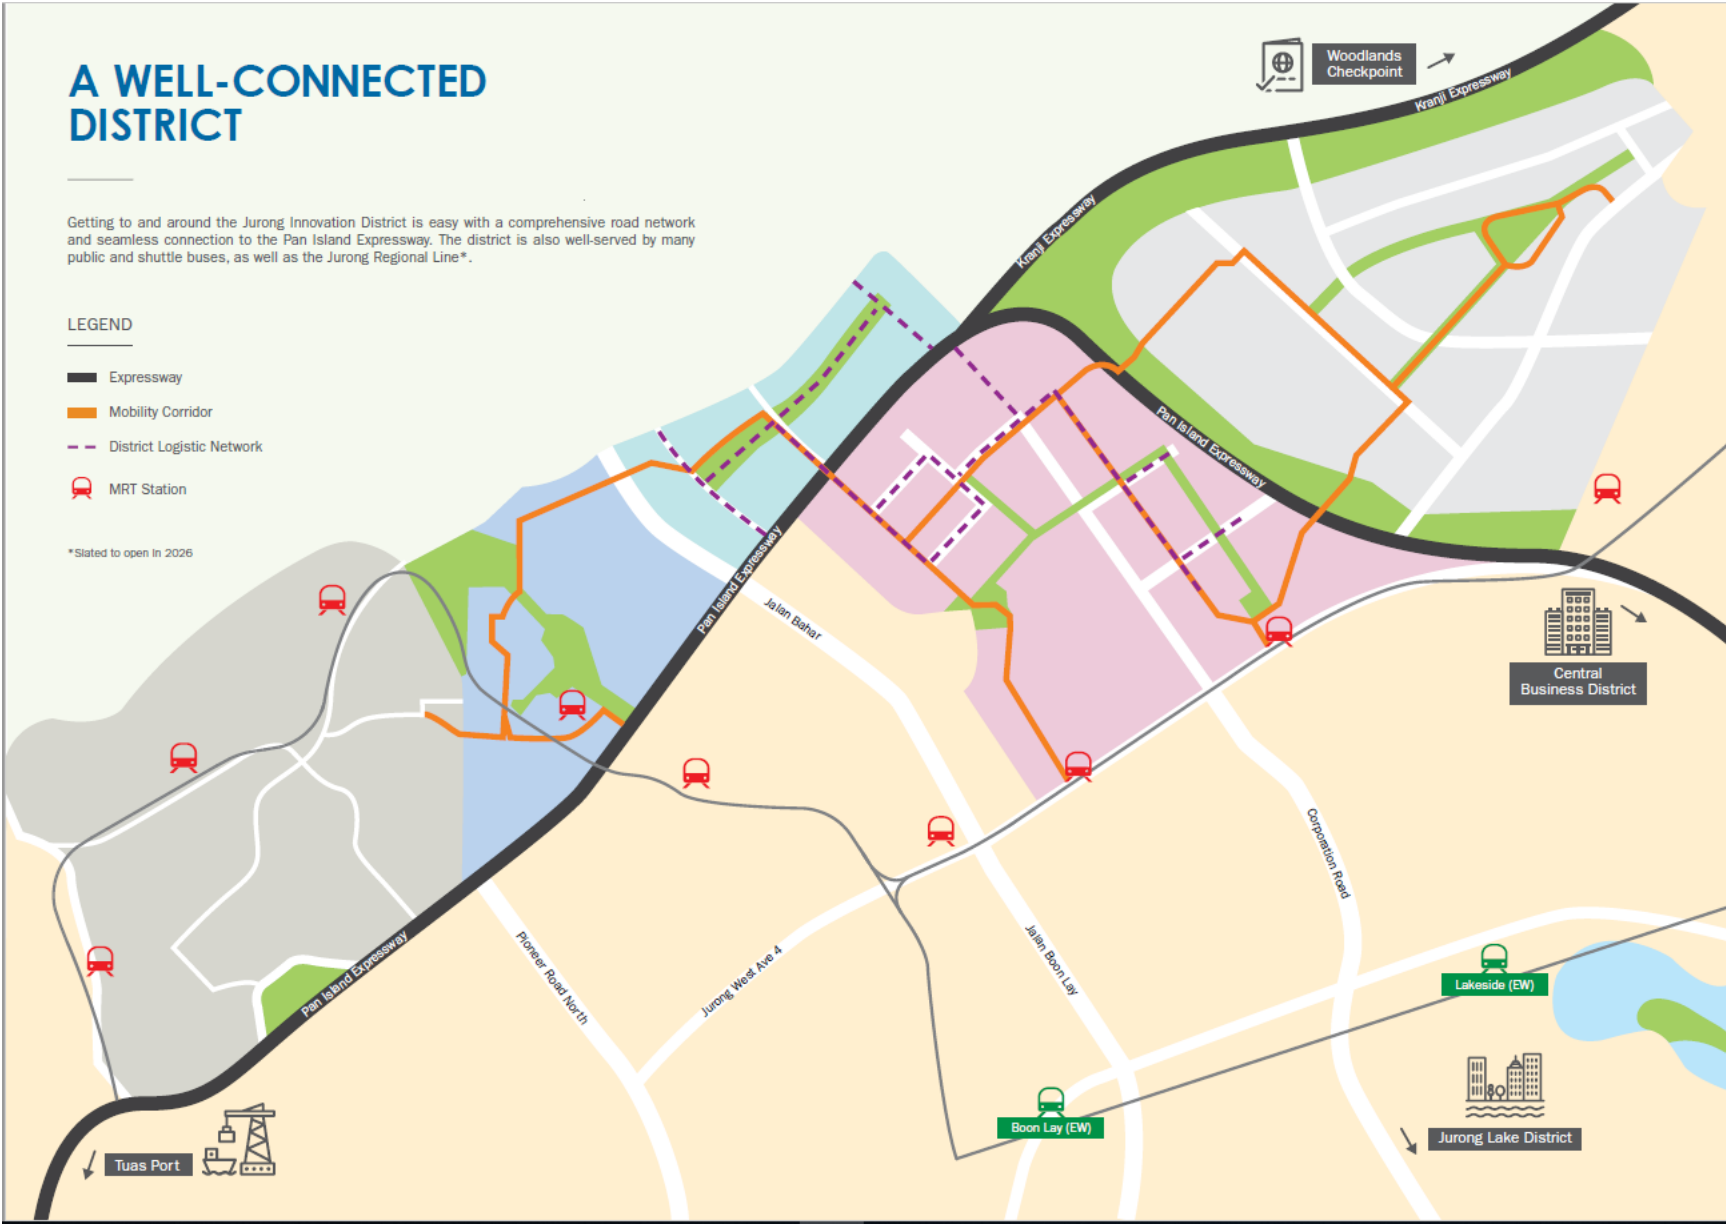

Here in JID, products of the future will be brought to life in laboratories, where they will be prototyped, test-bedded and produced for distribution to the world. The 5 precincts in the district will host the full value chain of manufacturing activities, and companies will be nestled in an interconnected ecosystem of innovators, enterprises and creators.

Companies will be able to plug into this ecosystem with available land and space units for lease within the district.

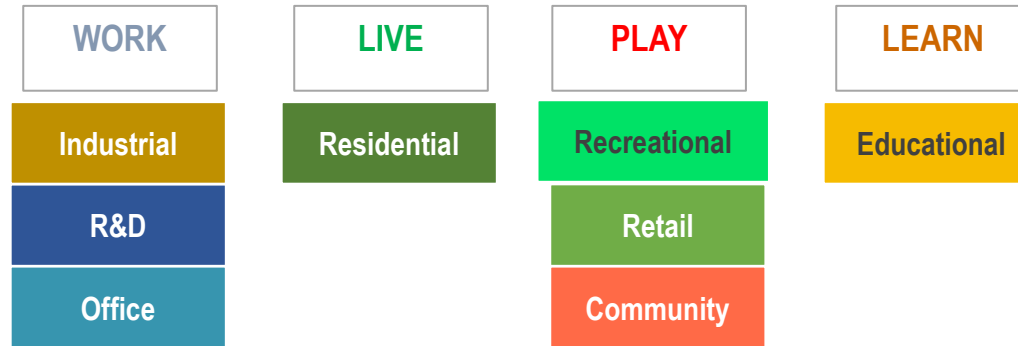

- **Industry 4.0, digitalisation and automation** is set to transform the future of manufacturing.
- Singapore is right at the forefront of that change, equipped with a rich knowledge base and sophisticated **smart nation infrastructure** to catapult businesses into the future.

JURONG INNOVATION DISTRICT - ACCESSIBILITY

JURONG INNOVATION DISTRICT - ZONING

JURONG INNOVATION DISTRICT - SMART PLATFORM

JURONG INNOVATION DISTRICT – VERTICAL INTEGRATION

GAIN THE ADVANTAGE OF FLEXIBILITY

As an enterprise district, Jurong Innovation District has the advantage of flexibility, enabling businesses to change or transfer uses across developments. This flexibility in land use allows for quick and seamless adaptation to market demand, and promotes co-location of various business activities. With a full industry value chain under one roof, businesses can enjoy greater efficiency and productivity.

FOCUS ON WHAT MATTERS

At Jurong Innovation District, businesses can look forward to a suite of services that are integrated, accessible and sustainable. With their infrastructure needs taken care of, they can focus on growing a thriving business.

Common Services Space

Renewable Energy Systems

Estate Operations Centre

Mobility Deck with People Mover System

District Logistics Network

District Cooling Plant and Outdoor Cooling System

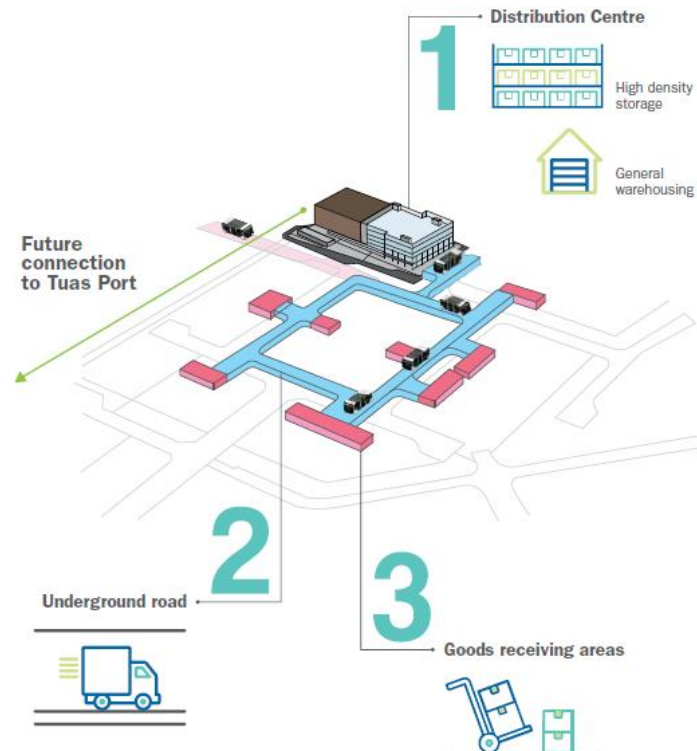

Hub Parking

JURONG INNOVATION DISTRICT – HORIZONTAL INTEGRATION

MOVE MORE, FASTER

Imagine an underground network that will allow goods to flow faster, without heavy vehicles causing traffic congestions. This will be Singapore's first underground district logistics network, connected to a 4.5-hectare central distribution centre for the storage, packing and distribution of goods.

MAKE THE DISTRICT YOUR PLAYGROUND

Jurong Innovation District will serve as a living lab for innovation, where companies will be able to house their full value chain of activities and bring ideas from laboratories to prototyping, test-bedding, production and distribution.

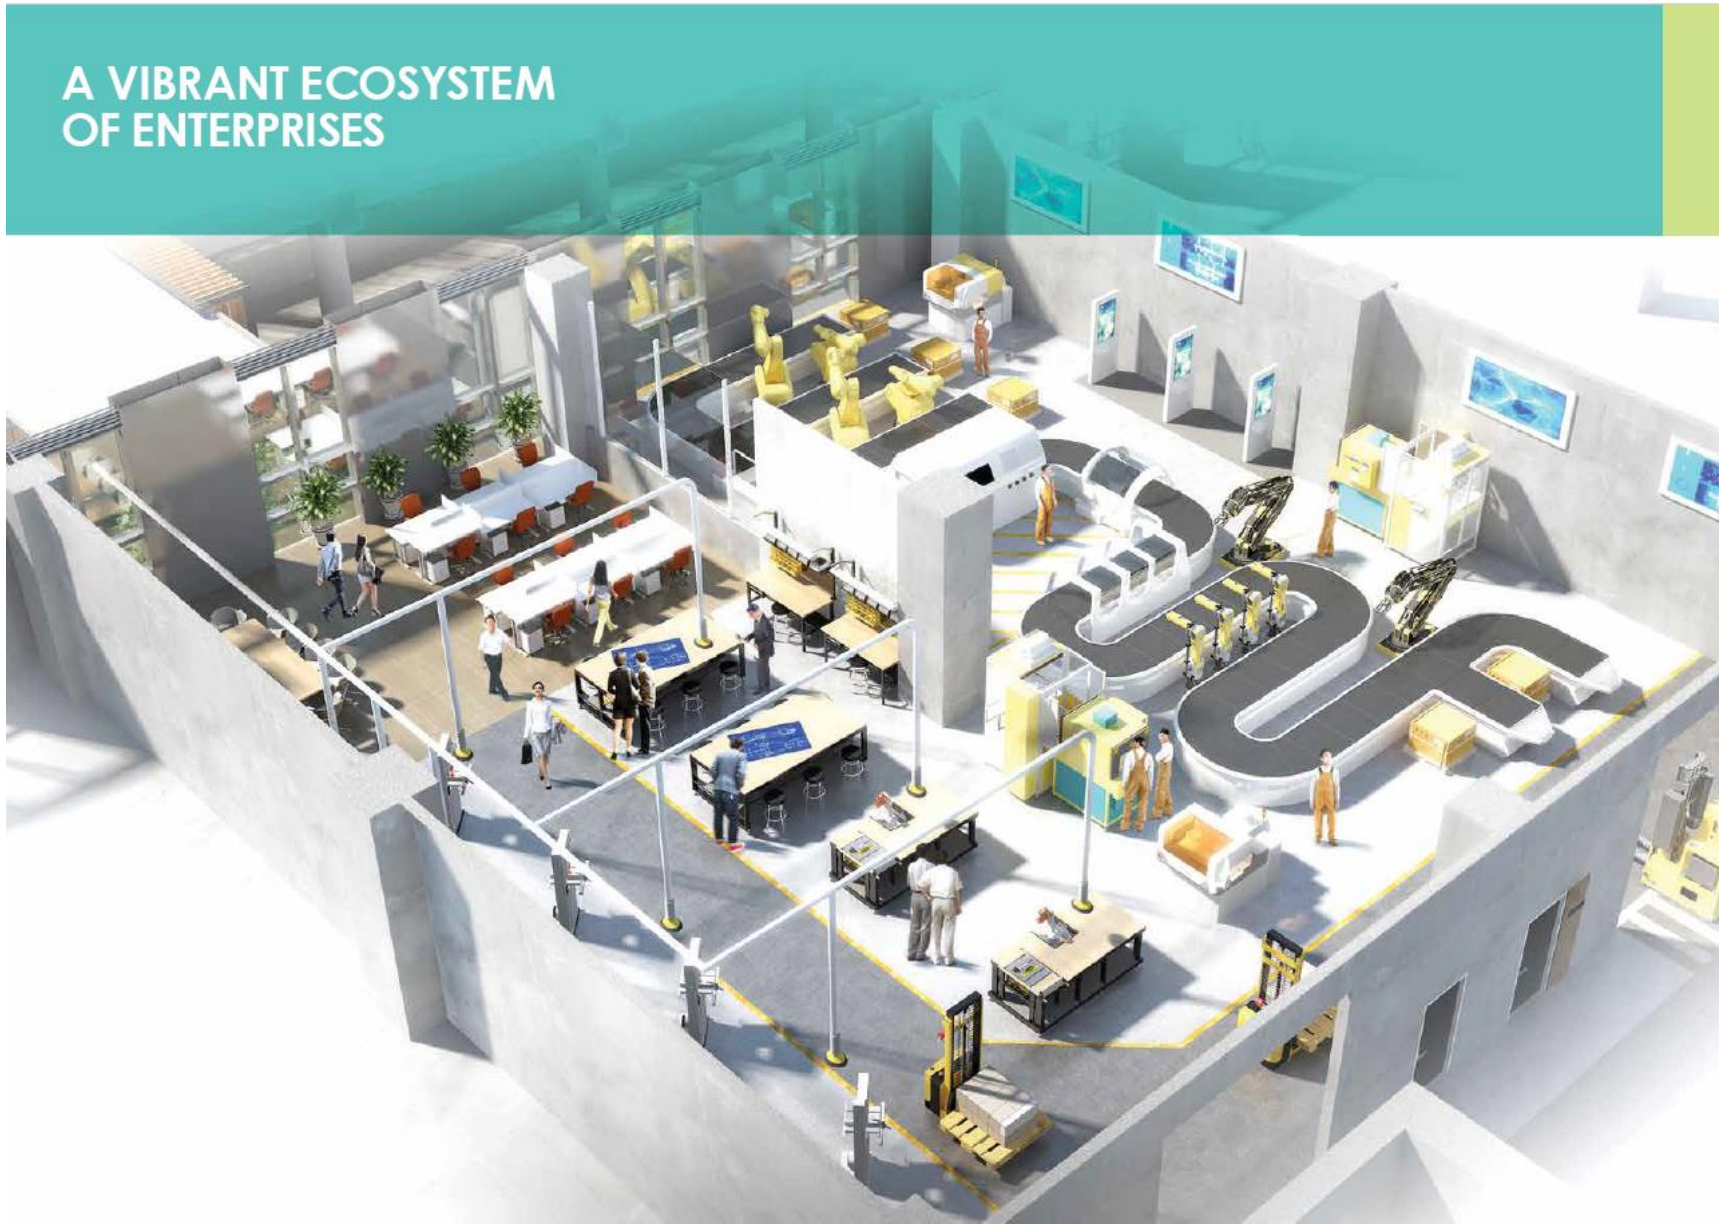

Startups in advanced manufacturing, urban solutions and engineering are already housed in LaunchPad @ JID, where the close proximity to the Nanyang Technological University, research institutes and a network of corporations foster strong collaborations and accelerate the commercialisation of new technologies.

The District will also play a key role in pioneering the future of urban transportation. Earmarked for the pilot deployment of autonomous vehicles, JID is home to the Centre of Excellence for Testing and Research of Autonomous Vehicles – NTU (CETRA), a 2-hectare facility that houses a test circuit with a simulated road environment for the testing and certification of autonomous vehicles.

JURONG INNOVATION DISTRICT – AN ECOSYSTEM

A VIBRANT ECOSYSTEM

- 17. Hyundai Motor Group Innovation Centre in Singapore

CONCLUSION

JTC's role in Singapore's industrial development has undergone rapid transformation over the past six decades. Today JTC:

- *Focus on **next-generation** industrial estates and mixed-use districts*
- *Integrate mixed uses in one estate to create a **work-live-play-learn** environment*
- *Provide sustainable, liveable, connected & **smart solutions** for the estate*
- *Test-bed & integrate **new** ideas, technologies & land/space typologies*
- *Foster a vibrant community through **placemaking** initiatives*

CONCLUSION

The focus of Singapore's economic development today is on developing knowledge-based economy through:

- *Promotion of strong intellectual capital creation as a basis for developing knowledge-intensive companies and generating high-value-added jobs*
- *Government's commitments to R&D through an integrated and well-connected network of public and private sector research institutes*

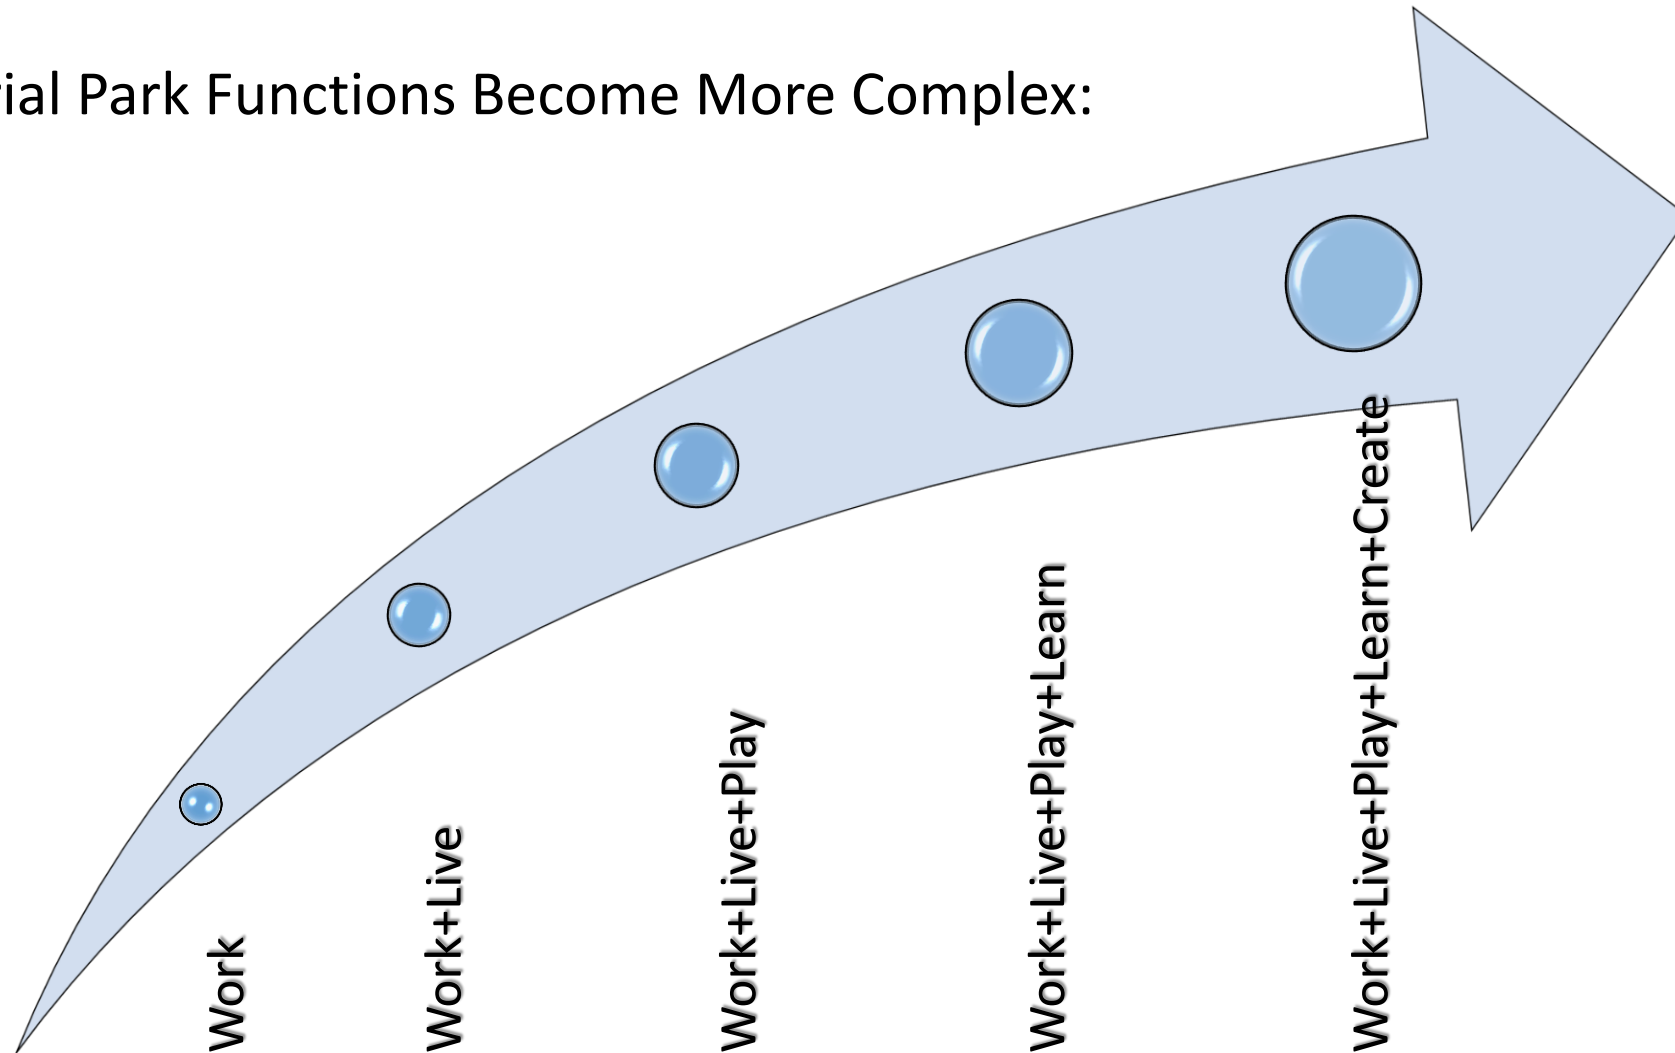

DISCUSSION:

WHAT WILL THE FUTURE INDUSTRIAL CLUSTERS BE?

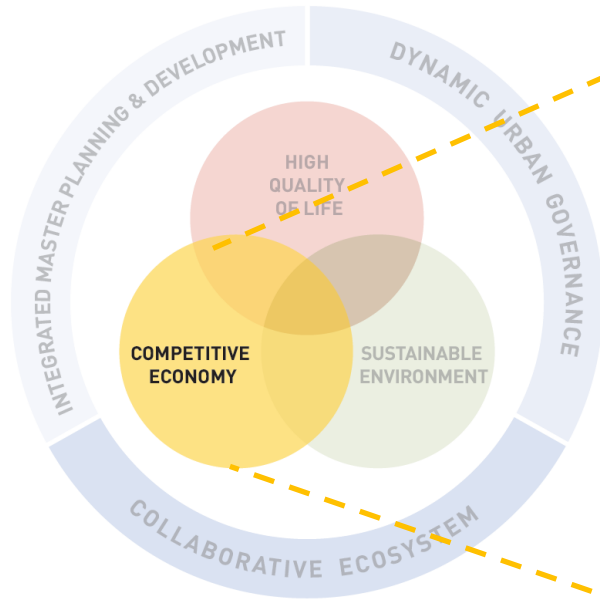

DISCUSSION: WHAT WILL FUTURE INDUSTRIAL PARKS BE?

Industrial Park Functions Become More Complex:

DISCUSSION:

WHAT WILL NEED TO BE ENHANCED TO ACHIEVE ECONOMIC COMPETITIVENESS?

1. Creative and innovative business environment

2. Inclusive workforce and an accessible education system

3. Economic resilience

LIM CHIN CHONG

Lim Chin Chong accumulates more than 35 years of experience in strategizing, planning, designing, developing and managing industrial parks and integrated developments. Currently he is a member of the International Expert Panel for Yangpu Economic Development Zone, Hainan Province of China. He has served as a member of Singapore Centre for Liveable Cities' Expert Panel. He is an Associate Trainer of Singapore Civil Service College, Singapore Cooperation Enterprise and Chandler Institute of Governance.

Key Projects

- Sino-Singapore Tianjin Eco-City, China (3,000 ha)
- China-Singapore Suzhou Industrial Park, China (7,000 ha)
- Jurong Island Petrochemical Hub, Singapore (3,200 ha)
- New Yangon City, Myanmar (12,000 ha)
- Clean Energy Special Industrial Zone, Cambodia (2,500 ha)
- Qinhan Avenue of Lintong District, Xi'an, China (1,500 ha)
- Conceptual Infrastructure Planning for Tanjung Bunga Township Development, Indonesia (700 ha)
- Conceptual Master Plan for Kota Kinabalu Industrial Park, Malaysia (4,300 ha)

Qualification / Credentials

- Senior Member of Institution of Engineers, Singapore
- Former Group Director, JTC, Singapore
- Former Deputy CEO, Sino-Singapore Tianjin Eco-city Investment and Development Co. Ltd
- Former Member of Singapore Government's Development Project Advisory Panel

Education

- Advanced Management Programme, INSEAD, France
- Master of Business Administration (Accountancy), Nanyang Technological University, Singapore
- Master of Science (Civil Engineering), National University of Singapore
- Bachelor of Engineering (Civil Engineering, First Class Hons) National University of Singapore

THANK YOU!
